Lead Quantitative Strategist & Institutional Portfolio Manager Briefing

Date: August 6, 2026

Current Session Highlight: New York Session Pre-Open Briefing (1 Hr Before Open)

Session News Focus: Wall Street pre-market movers, US Federal Reserve news, mega-cap US stocks (NVDA, MSFT, TSLA), and WTI Crude Oil catalysts.

SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- **US Federal Reserve:** Expectations for a September rate hike have eased following weaker private sector employment data, contributing to a more attractive environment for gold. The Fed's target range remains unchanged at 3.50-3.75% since early 2026, with projections indicating only a single quarter-point cut by year-end. The upcoming leadership transition for the Federal Reserve, with Jerome Powell's term expiring in May, is a significant factor for 2026.
- **European Central Bank (ECB):** A rebound in energy prices has prompted the ECB to initiate precautionary rate hikes.
- **Global Growth & Inflation:** Global economic expansion is moderating but remains broadly resilient, with India identified as a key growth driver. Disinflation continues unevenly, as services inflation and wage-driven components prove more persistent.
- **Currency & Yields:** The Wall Street Journal Dollar Index has climbed slightly to 96.07. However, a weaker US dollar is making gold more appealing. US 10-year Treasury yields saw a marginal increase to 4.624%, with German 10-year Bund yields also rising slightly.

2. US & European Markets

- **US Futures & Pre-market:** S&P 500 futures are up 0.2% and Dow Jones Industrial Average futures are up 0.3%, while Nasdaq 100 futures have slipped by 0.52-0.6%. This mixed sentiment is largely driven by weakness in the tech sector.
- **European Equities:** Major European indices are trading higher, with the Stoxx Europe 600 gaining 0.4%, France's CAC 40 up 0.7%, Germany's DAX climbing 0.2%, and the FTSE 100 adding 0.3%.
- **Wall Street Movers:**
 - **Down:** Semiconductor-related stocks Western Digital (-15%) and SanDisk (-9%) plunged in pre-market despite strong AI-driven demand forecasts. AppLovin (-16%) missed revenue estimates, and Honeywell Aerospace lost significant value. Fiserv shares tumbled 12% after cutting its full-year profit forecast.
 - **Up:** SpaceX shares are up 3% in pre-market trading as the first post-IPO lockup period expires. Keurig Dr Pepper jumped 3% on stronger-than-expected earnings. Deutsche Telekom and Diageo also saw notable gains after positive corporate announcements. Moderna rose 4% following regulatory approval for its mRNA influenza vaccine.
- **Mega-Cap US Stocks & Semiconductors:** Mega-caps like Meta and Amazon are marginally higher, with Amazon recently joining the \$3 trillion market cap club. Microsoft has seen a significant 30% rally over the past two weeks. Nvidia continues to dominate the AI compute market, with easing concerns in its credit market. However, the broader semiconductor sector is experiencing a sell-off in Asia, possibly due to profit-taking. TSMC is reportedly holding \$1 billion worth of Apple A20 Pro SoCs due to DRAM supply shortages, which could delay new iPhone models. SpaceX announced plans to construct a vertically integrated semiconductor fabrication plant in Texas.

3. Indian Markets & Dalal Street

- **Benchmark Performance:** Indian equity markets concluded on a mixed note. The Sensex climbed 374 points (0.48%) to settle at 78,954.76, while the Nifty 50 ended largely flat, up 11.35 points (0.05%) at 24,636. This divergence is partly attributed to the new Closing Auction Session (CAS) mechanism introduced earlier this week.
- **Corporate Earnings:** Blue Star reported a 14.9% year-on-year decline in its Q1 net profit.
- **FII/DII Flows:** Foreign Institutional Investors (FIIs) were net sellers, offloading equities worth ₹943.42 crore on Wednesday. Conversely, Domestic Institutional Investors (DIIs) were net buyers, injecting ₹2,883.17 crore into the market on August 5, 2026. A significant structural shift is evident, with DII holdings in Nifty-500 companies reaching a record 21%, while FII ownership has fallen to an all-time low of 17% in June 2026. This highlights the increasing influence of domestic capital in Indian equities.
- **Sectoral Momentum:** The Sensex rally was largely driven by heavyweight stocks such as Reliance Industries (+3.43%), State Bank of India (+3.02%), Bharat Electronics (+2.56%), and ICICI Bank (+2.28%). Power Grid Corporation was among the biggest decliners (-3.99%). The Nifty PSU Bank and Nifty Chemical sectors outperformed, while Nifty Realty, Media, and Auto underperformed.

4. Commodities & Crypto Wire

- **WTI Crude Oil:** Brent crude is up 0.3% at \$79.70 a barrel, and WTI crude rose 0.1% to \$75.31 a barrel. Brent crude saw a more significant rise of 2.21% to \$80.39 earlier in the session. Oil prices are supported by hopes of a Middle East peace deal and reports of an agreement between Iran and Oman regarding a shipping route through the Strait of Hormuz, which could ease inflation concerns.
- **OPEC+ Updates:** OPEC+ has decided to increase oil production by 188,000 barrels per day from September 2026, marking the completion of the phased rollback of voluntary supply cuts initiated in 2023. A separate, larger cut of approximately 2 million barrels per day remains in effect until the end of 2026.
- **Gold:** Gold prices have surged to a seven-week high, reaching \$4,285.84-\$4,321.50 per ounce. This rally is primarily driven by declining expectations for Federal Reserve rate hikes and a weaker US dollar. Strong central bank demand continues to be a significant long-term driver for gold. Global investors also added gold ETFs to their portfolios in July. The upcoming US Non-Farm Payrolls report is a key event that could influence gold's trajectory.
- **Crypto Regulatory & Adoption Headlines:**
 - **US CLARITY Act:** The CLARITY Act, aiming to establish clear regulatory rules for the US crypto market, faces an uncertain future in the Senate before its August recess. A delay in its passage could trigger a short-term sell-off in Bitcoin.
 - **European Regulations:** New EU cryptocurrency regulations (MiCA) are reportedly being exploited by fraudsters who impersonate crypto firms and regulators.
 - **Russia & Kenya:** Russia has formalized its crypto market with a new law effective September 1, regulating exchanges, custodians, and mining, though cryptocurrency remains banned for domestic goods and services. Kenya has approved new Virtual Asset Service Providers (VASP) regulations, granting its central bank significant control over digital currency transactions and requiring central bank approval for stablecoins.
 - **Crypto Prices:** Bitcoin (BTC) is up 0.90% at \$63,642.00, while Ethereum (ETH) is slightly down by 0.18% at \$1,861.50.
