SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The Federal Reserve is widely expected to hold interest rates steady at its September 15-16 meeting for the remainder of the year, despite market expectations for rate hikes. However, a Reuters poll indicates a rising number of analysts foresee at least one hike.
- US Producer Price Index (PPI) data is due today, with Consumer Price Index (CPI) data to follow on Friday, which will be crucial for the Fed's policy path.
- The European Central Bank (ECB) is anticipated to raise its Deposit Facility Rate by 25 basis points (bps) to 2.5% at its monetary policy decision announcement today. This move is fully priced in by traders.
- The Bank of Japan (BoJ) is also expected to raise its policy rate by 25 bps at its September meeting, to 1.25%, the highest in nearly 31 years, supported by inflationary risks from higher oil prices and a weaker Yen.
- The Reserve Bank of Australia (RBA) is showing a hawkish bias, with market participants increasingly confident of another rate hike this year due to warnings of upside inflation risks.

2. US & European Markets

- US stock futures, including S&P 500 and Nasdaq 100, show mixed to slightly positive movement pre-market.
- Mega-cap tech stocks like NVDA, MSFT, and TSLA will be in focus, influenced by overall market sentiment ahead of key US inflation data and the upcoming Fed meeting.
- European markets are showing mixed performance, with concerns about interest rates and inflation remaining prevalent.

3. Indian Markets & Dalal Street

- The Indian stock market is trading choppy today, with Sensex and Nifty struggling for direction.
- Nifty 50 is currently trading around 23,430.60, down slightly, while Bank Nifty is trading at ₹56,295.55, down 0.85% from its previous close.
- PSU banks are emerging as the strongest performing sector, followed by oil & gas and private banks, while auto, pharma, and healthcare sectors are under pressure.
- Foreign Institutional Investors (FII) and Domestic Institutional Investors (DII) flows will be keenly watched for directional cues.

4. Commodities & Crypto Wire

- WTI Crude Oil prices are volatile, trading near \$92.30, after touching a nearly two-month high of \$93.29 recently. The re-escalation of the US-Iran conflict and shipping restrictions in the Strait of Hormuz are providing sustained upward momentum. OPEC+ recently agreed to keep oil output policy unchanged for October.
- Gold prices are holding steady above \$4,400, attracting some buyers after a modest dip, as traders await US inflation data. Spot gold is at \$4,424.50 per troy ounce as of 3:00 a.m. ET, up \$23.70 today.
- The global crypto regulatory landscape is shifting towards implementation, with the EU's MiCA regulation fully active since December 2024.
- The US CLARITY Act, a major piece of crypto regulation, faces a crucial Senate procedural vote on September 15, which could reshape US crypto market operations. DeFi remains a key regulatory challenge.
