**SESSION NEWS FOCUS:** Wall Street pre-market movers, US Federal Reserve news, mega-cap US stocks (NVDA, MSFT, TSLA), and WTI Crude Oil catalysts.

## 📰 SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

### 1. Global Macro & Central Banks

- US Federal Reserve Chairman Kevin Warsh expressed optimism about the resilience of the US economy, noting global economies are holding up despite ongoing energy shocks and tighter monetary policies aimed at combating inflation. He indicated a rate hike occurred last month, and markets anticipate the Fed to maintain rates this month, with a potential 25 basis point hike in December.
- European Central Bank (ECB) President Christine Lagarde highlighted the global economy's surprising resilience amid high uncertainty, with upside risks to inflation stemming from the Middle East conflict and the Russia-Ukraine war, which could escalate energy and food prices. The Euro area's growth for 2026 is projected at 0.9%.
- The IMF and World Bank Annual Meetings are currently taking place in Bangkok, where discussions are centered on geopolitical conflicts, climate shocks, disruptions from artificial intelligence, energy volatility, and tight financial conditions.
- Central banks are grappling with a "stagflation dilemma" driven by supply shocks, leading to diverse policy responses across different regions.

### 2. US & European Markets

- Wall Street staged a rebound despite inflationary pressures, with AI chip stocks spearheading the gains.
- MSCI is reportedly planning to reclassify Strategy Inc. (MSTR), a significant corporate holder of Bitcoin, as a "non-operating" entity, potentially leading to its removal from MSCI's global indexes. This news caused MSTR stock to fall by 9.6% on October 16, though Bitcoin's price remained relatively stable.
- The Nasdaq index saw a 2.15% drop, influenced by concerns over AI-related debt and a surge in oil prices, impacting risk appetite. The CBOE Volatility Index (VIX) also rose to 21.41.
- Pre-market activity on October 16 showed gainers including PMI (+23.0%), AEHL (+12.4%), and NBIZ (+8.1%), while significant decliners were GUTS (-48.6%), FOXF (-18.8%), and TLK (-15.1%). The most actively traded stocks were HODO, SXTC, and ZTG.
- Regarding mega-cap US stocks:
  - Nvidia (NVDA) and SpaceX are exploring the development of space-based data centers, and Nvidia CEO Jensen Huang advocated for US-China collaboration on AI safety. NVDA stock was down 1.43% on October 17.
  - Microsoft (MSFT) CEO Satya Nadella issued a warning regarding security risks associated with AI models, and retail sentiment around MSFT stock shifted to 'bearish'.
  - Tesla (TSLA) CEO Elon Musk unveiled a flying Roadster prototype, but retail sentiment for TSLA stock slipped to 'bearish'.

### 3. Indian Markets & Dalal Street

- Indian equity benchmarks demonstrated a strong recovery for the second consecutive week, with the Sensex closing up 0.56% at 74,729 and the Nifty gaining 0.65% to reach 23,146 on October 16.
- The rally was predominantly led by IT stocks, driven by better-than-expected quarterly earnings and a selloff in global AI markets that encouraged value buying. The Nifty IT index surged 3.9% on Friday, with Tech Mahindra, TCS, Infosys, and HCLTech registering as top performers.
- The Reserve Bank of India's (RBI) provision of a special dollar window for oil marketing companies contributed to the rupee's rebound.
- Foreign Institutional Investors (FIIs) became net buyers in Indian equities on Friday, with inflows of Rs 11.66 billion.
- The rising crude prices, fueled by escalating geopolitical tensions and Brent briefly exceeding $110 a barrel, continue to pose a risk to Indian markets.

### 4. Commodities & Crypto Wire

- **Crude Oil:** WTI Crude Oil was trading around $101.84, up 0.42%, while Brent crude was approximately $109.74, showing a 3.61% increase on October 17. Geopolitical tensions in the Middle East, including Houthi attacks and disruptions in the Strait of Hormuz, are primarily driving oil prices higher, despite increased output from OPEC+. US President Trump's waiver of Russia energy tariffs and the prospect of a US-Russia diesel agreement could potentially add to global supply.
- **Gold:** Gold prices surged on October 17, attributed to a weaker US dollar, declining treasury yields, and the Federal Reserve Chairman not signaling an immediate rate hike. Gold was trading around $4,186.70, marking a 0.13% increase. Indian domestic gold prices also saw an upward trend.
- **Crypto:** Bitcoin was trading at approximately $81,437 on October 17, experiencing a 0.62% loss over a 24-hour period. Deutsche Bank is expected to launch institutional crypto custody services in Germany within weeks, supporting Bitcoin, Ether, USDC, EURC, and EURAU. The Indonesian Religious Affairs Minister indicated that the Islamic ruling prohibiting cryptocurrency could be revised in the future. US Spot Crypto ETFs recorded $89.4 million in outflows, led by Ethereum, although US Spot Bitcoin ETFs saw a return to net inflows with $5.06 million. The failure of the Digital Asset Market Clarity Act in the US Senate has shifted the focus of crypto regulation to the SEC and CFTC.
