SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The New York Federal Reserve is scheduled to release its Q2 2026 Household Debt and Credit Report today at 11:00 AM ET (3:00 PM UTC).
- On July 29, 2026, the Federal Reserve maintained interest rates at 3.5%-3.75%, though a 9-3 vote signals increasing pressure for a potential rate hike in September due to persistent inflationary pressures. Fed Chair Kevin Warsh emphasized the commitment to price stability and ongoing assessment of underlying inflation amid various economic shocks.
- President Trump has indicated his preference for lower interest rates while reiterating support for Fed Chair Warsh.
- The Reserve Bank of Australia (RBA) kept its Cash Rate unchanged at 4.35%.
- Policy sentiment among 12 of 14 major central banks has shifted towards a more hawkish stance over the past year.
- The Indian Rupee depreciated 14 paise against the US Dollar, settling at 95.44, influenced by the ongoing West Asia crisis and a weaker equity market, despite some support from Foreign Institutional Investor (FII) inflows and Reserve Bank of India (RBI) intervention.

2. US & European Markets

- US stock futures are mixed in pre-market trading, with Nasdaq futures showing a modest gain of 0.3%, S&P 500 futures up 0.1%, and Dow Jones Industrial Average futures down 0.1%, as investors monitor developments in the US-Iran conflict and rising oil prices.
- Notable pre-market movers include Babcock & Wilcox (BW), which surged over 41%.
- NVIDIA (NVDA) is mobilizing over \$500 billion for AI infrastructure funding through collaborations with major financial institutions, including BlackRock, Apollo, and Goldman Sachs.
- Taiwanese chipmaker TSMC plans to invest \$1.77 billion in a joint venture with Sony Group to advance next-generation image sensor technology.
- Intel (INTC) has upsized its share sale to \$20 billion, driven by strong market demand.
- The trajectory of the US equity rally is closely tied to Wednesday's upcoming US inflation report.

3. Indian Markets & Dalal Street

- Indian benchmark indices concluded Tuesday's trading session lower, influenced by higher crude oil prices and an impasse in US-Iran negotiations. The Sensex declined by 0.49% to 78,154.25, and the Nifty50 fell by 0.46% to 24,471.70, closing below the 24,500 mark.
- Key support for the Nifty is observed at 24,400, while resistance lies between 24,600 and 24,650.
- GIFT Nifty indicated a cautious opening for Indian markets, trading down 0.08% at 24,611.50 in early trade.
- Several companies reported Q1 FY27 results today, with Zydus Lifesciences surging over 7% and Bosch gaining 4% following strong earnings. TCPL Packaging also saw a significant year-on-year rise of 79% in its Q1 net profit.
- Foreign Institutional Investors (FIIs) have recorded net inflows of \$1.5 billion into Indian equities this August, adding to \$2.1 billion in July, although they remain net sellers for the year with \$25.7 billion offloaded. Domestic Institutional Investors (DIIs) continue to show strong support, with \$3.7 billion in inflows in July 2026, and their net investment exceeding Rs 5 trillion for the third consecutive year.
- Sectoral performance saw Nifty Pharma and Nifty IT sectors outperform, while Nifty Cement, Nifty FMCG, Nifty Realty, and Nifty Metal sectors experienced declines.

4. Commodities & Crypto Wire

- WTI Crude Oil prices have surged, driven by geopolitical tensions and dimming prospects for a diplomatic resolution to reopen the Strait of Hormuz, with WTI trading up 5% on Monday to \$82 and Brent crude surpassing \$90 a barrel. The EIA is expected to release its Short-Term Energy Outlook today. Market predictions suggest WTI is likely to reach \$85 in August.
- Gold futures gained 0.39% to \$4,437.10 an ounce in early trading, following its strongest weekly rally in over six years (7.7% increase) fueled by weaker US employment data, easing inflation fears, and robust investor demand, especially from China. The next major resistance for gold is identified at \$4,493.
- The US SEC is poised to consider a proposal on August 14 to establish a specialized regulatory framework for certain crypto investment contracts, a move that could particularly benefit XRP by clarifying its status as a digital commodity.
- Federal banking agencies have softened their stance on crypto relationships, and the Federal Reserve has integrated crypto-related banking supervision into standard channels, signaling growing legitimacy for crypto institutions within the banking system.
- Russia's central bank has proposed allowing organized public trading of Bitcoin, Ethereum, and Tether USDT, aiming to create a regulated link between ruble liquidity and global digital asset markets, albeit with strict controls for non-qualified investors.
