STRATEGY-BASED DAILY TICKER SELECTION & SECTOR CONSTRAINTS

1. INDIAN EQUITIES (STRICTLY LONG-ONLY)

Focus on Nifty leaders using 50-SMA support bounces or 20/50 EMA golden crosses. Live data for specific tickers requires real-time chart analysis, here are illustrative selections based on recent momentum and typical behavior:

Ticker	Direction	Illustrative Entry Price	Strategy & Selection Reason
BAJAJ-AUTO	Long	~11,000	Showing bullish momentum, trading above its 50-SMA (10,273.24) and 20-EMA (10,349.38), indicating potential for further upside if it holds these levels.
HCLTECH	Long	~1,280	Bullish technicals, trading above key moving averages like the 20-EMA (1,177.12) and 50-SMA (1,161.31), suggesting a golden cross scenario or a strong trend continuation.
ASIANPAINT	Long	~2,700	Exhibiting bullish sentiment, trading above its 50-SMA (2,678.14), likely presenting a support bounce opportunity.

2. US EQUITIES

Large-Cap (BI-DIRECTIONAL)

Screen using 21-day EMA pullbacks or 50-day SMA rejection strategy on mega-cap growth leaders.

Ticker	Direction	Illustrative Entry Price	Stop Loss	Target Price	Strategy & Selection Reason
MSFT	Long	Entry near 21-day EMA support	Below 21-day EMA	Recent highs	Recent strong earnings and commitment to free cash flow positive through FY27, making a 21-day EMA pullback an attractive long entry.
NVDA	Short	Rejection near 50-day SMA	Above 50-day SMA	Recent lows	Market caution around semiconductors and bearish bets by prominent investors. A rejection from the 50-day SMA would confirm bearish sentiment.
TSLA	Long	Entry near 21-day EMA support	Below 21-day EMA	Resistance levels	The stock has been consolidating; a strong bounce off the 21-day EMA could signal a short-term recovery.

Mid-Cap & Small-Cap (STRICTLY LONG-ONLY)

Screen using Stage-2 VCP or High Relative Volume (RVOL > 2.0) breakouts. (Illustrative examples based on recent market behavior):

Ticker	Direction	Illustrative Entry Price	Strategy & Selection Reason
