Session Highlight:  New York Session Pre-Open Briefing (1 Hr Before Open)

Session News Focus: Wall Street pre-market movers, US Federal Reserve news, mega-cap US stocks (NVDA, MSFT, TSLA), and WTI Crude Oil catalysts.

SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The US Federal Reserve is expected to raise interest rates this week to tackle persistently high inflation, with market pricing suggesting a high likelihood of a 25 basis point hike. Fed Chair Kevin Warsh's credibility is on the line, especially given pressure from President Donald Trump to avoid rate hikes.
- The European Central Bank (ECB) recently raised rates by 25 basis points, while the Bank of Japan (BOJ) is also anticipated to increase its policy rate by 25 basis points to 1.25% due to elevated inflation. This divergence in central bank policies creates a tug-of-war in currency markets, particularly for EUR/USD.
- A vessel was struck by an unidentified projectile in the Strait of Hormuz, and Iraq temporarily closed border crossings with Iran after a drone targeted a Saudi oil pipeline. These events heighten geopolitical risk and concerns over global oil supply.
- BRICS nations, including India and Iran, are advocating for reduced reliance on the U.S. dollar in intra-BRICS trade.

2. US & European Markets

- Wall Street is anticipating a potentially volatile week, with the Fed's interest rate decision being a primary driver. Futures markets are showing mixed signals with SPY, QQQ, and DIA slightly up in pre-market, while major indices are above their 200-day SMAs.
- Concerns are rising about corporate profit margins due to tariffs and increasing bond market risks from massive debt issuance.
- Major AI rivals, including OpenAI, Anthropic, and Elon Musk, have expressed concerns about AI safety and the need to slow down its development, with OpenAI potentially delaying its IPO. President Trump, however, downplayed AI safety concerns, emphasizing the US lead over China.
- Mega-cap US stocks like NVDA and TSLA are in focus. Nvidia (NVDA) showed minor pre-market movement, while Tesla (TSLA) was up. There are discussions around Apple and Taiwan Semiconductor Manufacturing's new chip and Elon Musk's choice between Nvidia and AMD for SpaceX.
- Premarket movers include Tenon Medical Inc. (TNON) and ACV Auctions Inc. (ACVA) among gainers.

3. Indian Markets & Dalal Street

- Foreign Portfolio Investors (FPIs) have withdrawn ₹13,138 crore from Indian equities in September 2026 so far, influenced by global factors like rising crude oil prices and US bond yields. This continues a trend of significant outflows in 2026.
- The Nifty 50 and Sensex both closed slightly down recently.
- India is focusing on expanding cooperation with the UAE in advanced technology and the digital economy, aiming to double bilateral trade to \$200 billion by 2032.
- BRICS summit in India saw calls for restraint amidst Middle East tensions and discussions on technology weaponization.

4. Commodities & Crypto Wire

- WTI Crude Oil prices remain elevated, trading around \$100-\$104, driven by persistent Middle East supply risks and geopolitical tensions, including drone attacks on Saudi oil infrastructure and disruptions in the Strait of Hormuz. A Saudi pipeline outage threatens a 4% loss in global supply. The price target for WTI crude oil is bullish, potentially reaching \$117.75.
- Gold prices have struggled to push above key resistance levels around \$4,480. Silver is also struggling due to high interest rates and a strong US dollar.
- Ethereum (ETH) is leading the crypto market, while the broader market struggles for direction. Bitcoin (BTC) is trading around \$77,192 with a slight dip.
