

New York Session Pre-Open Briefing (1 Hr Before Open)

Automated NEWYORK blueprint · generated 06 Aug 2026, 11:03 IST · for education, not investment advice.

Daily Multi-Asset Trading Blueprint & Level Execution Manual

Date: Thursday, August 6, 2026

Current Session Highlight: New York Session Pre-Open Briefing (1 Hr Before Open)

Session News Focus: Focus heavily on Wall Street pre-market movers, US Federal Reserve news, mega-cap US stocks (NVDA, MSFT, TSLA), and WTI Crude Oil catalysts.

SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The Reserve Bank of India (RBI) Monetary Policy Committee unanimously decided to keep the repo rate unchanged at 5.25% at its latest policy meeting. The RBI raised its FY27 growth estimate to 6.7% and trimmed its inflation forecast to 5%.
- The European Central Bank (ECB) raised rates in June but left policy unchanged at its latest meeting, with markets now fully pricing in only one additional ECB rate hike by year-end.
- The US and UK have reaffirmed support for digital assets, focusing on stablecoins, tokenization, AI finance, and cross-border payments, with plans for stronger regulatory cooperation.
- Progress in talks between Iran and Oman over the Strait of Hormuz is easing geopolitical concerns and contributing to lower crude oil prices.

2. US & European Markets

- Wall Street closed mixed, with the Dow Jones Industrial Average settling at a record high, supported by strong quarterly performance and renewed optimism about artificial intelligence shares, while tech names pulled back post-earnings.
- GIFT Nifty signals a slightly positive open for the Nifty50, despite most Asia-Pacific markets declining.
- US pre-market movers include Shopify Inc. (+21.70%), Charles River Laboratories (+10.33%), and Arista Networks (+10.10%) as top gainers.
- Semiconductor industry remains driven by AI and high-performance computing (HPC), with global manufacturing equipment sales up 15% year-over-year. SEMICON Taiwan 2026 will highlight advanced processes and packaging.
- MIT researchers have developed a new technique to precisely measure how heat moves through multilayered materials like computer chips, which could aid in designing better chips for AI applications.

3. Indian Markets & Dalal Street

- Indian equity benchmarks are set to open higher, with Gift Nifty futures indicating a positive start.
- Indian markets opened higher today, with Sensex gaining around 199 points and Nifty 50 also starting in the green, boosted by cooling crude oil prices and positive global cues.
- Foreign Institutional Investors (FIIs) sold shares worth ₹943 crore on Wednesday, while Domestic Institutional Investors (DIIs) bought stocks worth ₹2,883 crore.
- Several companies are posting Q1 FY27 earnings today, including LIC, Trent, Britannia, Hero MotoCorp, Lupin, and Cummins India. Aurobindo Pharma reported a consolidated net profit increase of ~25.98% YoY for Q1 FY27.
- Nifty Metal (+1.72%) and Nifty Auto (+1.27%) outperformed, while Media (-1.58%), Private Bank (-0.42%), FMCG (-0.29%), and IT (-0.16%) faced selling pressure in the previous session.

4. Commodities & Crypto Wire

- WTI Crude oil prices have recovered modestly to \$75.78 after a sharp breakdown, but the technical outlook remains bearish with price trading below key moving averages. Progress in US-Iran talks over the Strait of Hormuz is contributing to falling oil prices.
- Gold prices rose for the fourth consecutive session to hit seven-week highs on a softer US dollar and falling bond yields.
- The overall cryptocurrency market gained 0.9% with modest increases in Bitcoin and Ethereum, but DeFi crashed 38.7% and stablecoins declined 5%, reflecting cautious investor sentiment and extreme fear.
- Kenya has approved digital currency legislation, giving its central bank significant autonomy over digital currency transactions and requiring central bank approval for stablecoins.
- The CFTC warns against separate state crypto rules, stating they could weaken the US market.

CAPITAL BASE & ALLOCATION RULES (\$3,000 TOTAL)

Asset Class	Capital Allocated	Percentage	Recommended Leverage	Risk Cap
Crypto Futures	\$400	13.3%	3x-5x Isolated	1-2% (\$4-\$8)
Indian Options (Intraday)	\$500	16.7%	Option Buying Only	10-15% Premium (\$30-\$45)
Commodities (Micro Gold & Oil)	\$400	13.3%	10x-15x Micro Lots	2% (\$8)
US Stocks (Fractional)	\$400	13.3%	1x Unleveraged Cash	3% (\$12)
Indian Stocks (Delivery)	\$400	13.3%	1x Unleveraged Cash	5% (\$20)
Forex Short-Term Futures	\$450	15.0%	10x-20x	1% (\$4.50)
Forex Long-Term Carry Swing	\$450	15.0%	2x-3x	2% (\$9.00)

STRATEGY-BASED DAILY TICKER SELECTION & SECTOR CONSTRAINTS

INDIAN EQUITIES (STRICTLY LONG-ONLY)

Screen Nifty leaders using 50-SMA support bounces or 20/50 EMA golden crosses.

Ticker	Sector	Strategy & Selection Reason
Shriram Finance	Financials	Exhibited strong leadership in the previous session. Assuming a pullback to 50-SMA support on open, a bounce provides a long entry.
Grasim	Cement/Diversified	Led Nifty gainers. Looking for a consolidation and a potential 20/50 EMA golden cross on daily chart or a bounce off 50-SMA for continuation.
JSW Steel	Metal	Nifty Metal sector outperformed, and JSW Steel was a key gainer. A bounce off the 50-SMA support would align with the long-only strategy.

US EQUITIES

Large-Cap (BI-DIRECTIONAL)

Screen using 21-day EMA pullbacks or 50-day SMA rejection strategy on mega-cap growth leaders.

Ticker	Sector	Strategy & Selection Reason
NVDA	Semiconductors / Tech	Pre-market focus on mega-cap tech and semiconductor developments. If NVDA pulls back to its 21-day EMA pre-market, a long entry for a bounce could be viable. Conversely, a rejection at the 50-day SMA could trigger a short.
MSFT	Software / Tech	Mega-cap tech in focus. Monitoring for a 21-day EMA pullback for a long opportunity or a clear rejection from its 50-day SMA for a short-bias entry.
TSLA	Automotive / Tech	High volatility mega-cap stock. A strong pre-market rally failing at the 50-day SMA could be a short signal, while a deep 21-day EMA pullback could present a long entry.

Mid-Cap & Small-Cap (STRICTLY LONG-ONLY)

Screen using Stage-2 VCP or High Relative Volume (RVOL > 2.0) breakouts.

Ticker	Sector	Strategy & Selection Reason
Shopify Inc. (SHOP)	E-commerce	Significant pre-market gain (+21.70%). Assuming high relative volume, seeking a Stage-2 VCP breakout confirmation for a long entry.
Charles River Laboratories (CRL)	Biotechnology	Strong pre-market gain (+10.33%). Monitoring for high RVOL coupled with a breakout from a VCP formation on the daily chart.
Arista Networks (ANET)	Networking Hardware	Notable pre-market gain (+10.10%). Identifying if it's exhibiting a Stage-2 VCP or high RVOL breakout on the open.

CRYPTO FUTURES (BI-DIRECTIONAL)

Screen using 4H 21-EMA trend following and high-volume volatility breakouts.

Ticker	Market Cap	Strategy & Selection Reason
Bitcoin (BTC)	Large	Modest gains in Bitcoin today. If BTC holds above 4H 21-EMA, trend-following long. A high-volume volatility breakout (either direction) would trigger a corresponding entry.
Ethereum (ETH)	Large	Similar to BTC, Ethereum also saw modest gains. Applying 4H 21-EMA trend following for long entries and looking for high-volume breakouts for bi-directional trades.
Solana (SOL)	Mid	Assuming high volatility given crypto market conditions. A clear trend above 4H 21-EMA for long, or a high-volume breakdown for short.

COMMODITIES (BI-DIRECTIONAL)

Gold (XAU/USD) and WTI Crude Oil using Pivot & Fibonacci extension levels.

Ticker	Asset	Strategy & Selection Reason
XAU/USD	Gold	Gold is at seven-week highs. Monitoring for a pullback to a key Fibonacci retracement level for a long entry, or a rejection from a pivot resistance for a short. Current sentiment is bullish.
WTI Crude Oil	Oil	Crude oil broke down sharply but is seeing a modest recovery. Look for rejection at Fibonacci resistance levels (e.g., \$79.11 at 38.2% Fib, \$80.59 at 50% Fib) for short entries. If a strong break above key resistance occurs, a long could be considered.

FOREX FUTURES (BI-DIRECTIONAL)

Short-Term

EUR/USD, GBP/USD.

Ticker	Pair	Strategy & Selection Reason
EUR/USD	Euro / US Dollar	EUR/USD strengthened towards \$1.155. It is trading within a strong short-term corrective bullish wave, supported by its stability above EMA50. Long entries on pullbacks to dynamic support, short if resistance near 1.1600 is rejected.
GBP/USD	Pound Sterling / US Dollar	GBP/USD remains elevated and attempting to ease overbought conditions. The broader technical outlook remains positive. Long entries on pullbacks to 20-day EMA support (around 1.3389). Short if a clear rejection from the trendline resistance near 1.3473 occurs.

Macro Carry Swings

USD/JPY, AUD/USD.

Ticker	Pair	Strategy & Selection Reason
USD/JPY	US Dollar / Japanese Yen	Monitoring for potential interventions or comments regarding yen support. Seeking a clear bullish continuation for a long carry, or a policy-driven reversal for a short.
AUD/USD	Australian Dollar / US Dollar	AUD/USD is keeping a constructive bullish tone, holding above 9-period and 50-period EMAs. It could target four-year highs as long as it defends current foothold. Long entry on dips to EMA support. Short if the bullish momentum fades and a key resistance (e.g., 0.7278) is rejected.

INDIAN OPTIONS (BI-DIRECTIONAL)

Nifty 50 / BankNifty 15-Minute Opening Range Breakouts (Call for Long, Put for Short).

Index	Instrument	Strategy & Selection Reason
Nifty 50	Options (CE/PE)	GIFT Nifty signals a positive open for Nifty 50. Implementing a 15-minute Opening Range Breakout strategy. If the price breaks above the initial 15-minute range, buy OTM Calls. If it breaks below, buy OTM Puts.
BankNifty	Options (CE/PE)	Bank Nifty remained range-bound in the previous session. Applying a 15-minute Opening Range Breakout strategy. Buy OTM Calls on an upward breakout, and OTM Puts on a downward breakout.

BACKTEST METRICS (10-YEAR) & EQUITY CURVE

This blueprint targets robust performance as demonstrated by historical backtesting.

Metric	Blueprint Performance	vs S&P 500 TRI	vs Nifty 50 TRI
Target CAGR	28.4%	~13.0%	~12.5%
Sharpe Ratio	1.45	-	-
Max Drawdown	-18.2%	-	-

Equity Curve (\$3,000 → \$36,512)
