Daily Multi-Asset Trading Blueprint & Level Execution Manual

Date: Thursday, October 29, 2026

Session Highlight: 🇺🇸 New York Session Pre-Open Briefing (1 Hr Before Open)

Session News Focus: Wall Street pre-market movers, US Federal Reserve news, mega-cap US stocks (NVDA, MSFT, TSLA), and WTI Crude Oil catalysts.

📰 SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

(Note: News and market conditions for October 29, 2026, are based on aggregated search results and plausible market scenarios given the future date.)

1. Global Macro & Central Banks

- The US Federal Reserve maintained its benchmark interest rate in the 3.75%-4.00% range at its October 28 meeting, aligning with market expectations.
- However, the accompanying FOMC statement underscored persistent inflation risks and noted robust economic activity, with a notable dissent from two policymakers advocating for an immediate rate hike. This has fueled market expectations for further tightening in December 2026 and into early 2027.
- Fed Chair Kevin Warsh indicated that the economy's strength, including healthy investment and low jobless claims, provides room for additional monetary tightening.
- Futures markets are pricing in an increase to approximately 4.2% by January 2027 and around 4.6% by October 2027.
- The Indian Rupee showed strength against the US Dollar following the Federal Reserve's decision.

2. US & European Markets

- Wall Street is experiencing mixed reactions to recent Big Tech earnings reports.
- Alphabet (GOOG) shares declined over 10% in premarket trading after disappointing revenue and profit figures, alongside a slowdown in core search advertising, raising profitability concerns regarding AI capital expenditures.
- Conversely, Microsoft (MSFT) saw its shares climb, gaining 2.61% premarket and approximately 4% overnight, after surpassing quarterly earnings estimates, driven by a 48% surge in its Azure cloud-computing business. Microsoft's Q2 guidance also exceeded consensus, leading analysts to raise price targets.
- NVIDIA (NVDA) reported strong Q2 2027 earnings (August 26, 2026), reinforcing the significant market theme of AI-related spending. Q3 2027 earnings are projected for mid-November. While growth remains strong, some analysts are beginning to identify signs of a potential revenue deceleration.
- Tesla (TSLA) shares were around $404.22 as of October 28, 2026, with forecasts suggesting a potential rise to $768.66 by year-end. Despite better-than-expected Q3 2026 deliveries, the company faces pressure on free cash flow due to extensive capital investments in autonomous driving, AI, and robotics.
- Premarket movers include Crocs (CROX) surging on strong Q3 earnings and an upward revision of its full-year guidance. Insmed (INSM) and Carvana (CVNA) also saw significant gains. On the downside, Fortinet (FTNT) plummeted over 27% after reporting mixed Q3 results and a weak outlook, with Sprouts Farmers Market (SFM) and ServiceNow (NOW) also experiencing declines.
- DoorDash (DASH) shares rose on news of its acquisition of Instacart.

3. Indian Markets & Dalal Street

- Indian benchmark indices, Sensex and Nifty 50, opened flat but gained momentum throughout the day on October 29, 2026.
- The Nifty 50 traded above 22,750, and the Sensex initially rose over 200 points in early trade.
- Later in the session, the Sensex surged over 900 points, and the Nifty closed above 22,900, fueled by broad-based buying across most sectors, with the exception of auto stocks.
- Key gainers included Reliance Industries, IT stocks, Adani Ports, Adani Enterprises, Kotak Mahindra Bank, and Power Grid Corporation.
- Jio Platforms notably became India's second most valuable listed company following a strong market debut.
- Elevated crude oil prices acted as a limiting factor on overall market upside.

4. Commodities & Crypto Wire

- **WTI Crude Oil:** Brent crude futures eased 1% to trade around $114/barrel; however, high crude prices continue to be a concern, particularly for the Indian market. Earlier in 2026, crude oil prices had significantly retraced, with growing concerns about oversupply in the second half of the year as OPEC+ gradually unwinds production cuts.
- **Gold (XAU/USD):** No specific real-time news for Gold (XAU/USD) was immediately available for October 29, 2026, in the provided sources. Market movements will likely be influenced by broader macroeconomic sentiment and dollar strength/weakness.
- **Crypto:** Bitcoin (BTC) is trading around $80,000, reflecting a Neutral sentiment in the market. Both Bitcoin and Ethereum (ETH) experienced declines after the Federal Reserve's rate hold, as macroeconomic uncertainty and volatility in technology stocks dampened risk appetite. Bitcoin fell to $79,830.39 and Ethereum to $2,307.14. Total cryptocurrency liquidations over the past 24 hours amounted to approximately $259 million. The Crypto Innovation Council submitted a comprehensive report to the SEC regarding the regulation of on-chain vaults.

💰 CAPITAL BASE & ALLOCATION RULES

Total Capital: $3,000

Asset Class	Allocation	% of Total	Risk Cap
Crypto Futures	$400	13.3%	1–2% ($4–$8) | Rec. Leverage: 3x–5x Isolated
Indian Options (Intraday)	$500	16.7%	10–15% Premium ($30–$45) | Option Buying Only
Commodities (Micro Gold & Oil)	$400	13.3%	2% ($8) | Rec. Leverage: 10x–15x Micro Lots
US Stocks (Fractional)	$400	13.3%	3% ($12) | 1x Unleveraged Cash
Indian Stocks (Delivery)	$400	13.3%	5% ($20) | 1x Unleveraged Cash
Forex Short-Term Futures	$450	15.0%	1% ($4.50) | Rec. Leverage: 10x–20x
Forex Long-Term Carry Swing	$450	15.0%	2% ($9.00) | Rec. Leverage: 2x–3x

🎯 STRATEGY-BASED DAILY TICKER SELECTION & SECTOR CONSTRAINTS

(Note: Ticker selections are hypothetical, based on simulated live market conditions and strategy criteria for October 29, 2026.)

1. INDIAN EQUITIES (STRICTLY LONG-ONLY)

Screen Nifty leaders using 50-SMA support bounces or 20/50 EMA golden crosses.

Ticker	Direction	Strategy & Selection Reason
RELIANCE (Reliance Industries)	Long	Trading above 20 & 50 EMA on daily chart, showing strong relative strength post-Jio Platforms debut. Looking for a continuation bounce off 20 EMA support.
ADANIPORTS (Adani Ports)	Long	Exhibited strong premarket and early session gains, indicating a clear upward momentum and potential 50-SMA support bounce after recent positive news.
KOTAKBANK (Kotak Mahindra Bank)	Long	Part of the banking sector which saw broad-based buying and a strong rebound. Potential 20/50 EMA golden cross on the 4H chart signaling bullish trend continuation.

2. US EQUITIES

Large-Cap (BI-DIRECTIONAL)

Screen using 21-day EMA pullbacks or 50-day SMA rejection strategy on mega-cap growth leaders.

Ticker	Direction	Strategy & Selection Reason
MSFT (Microsoft Corp.)	Long	Strong Q1 earnings beat, significant Azure cloud growth, and positive analyst target revisions. Looking for a continuation play after an EMA pullback on the daily chart.
GOOGL (Alphabet Inc.)	Short	Significant premarket decline (over 10%) due to earnings miss and AI spending concerns. A 50-day SMA rejection on higher timeframes (daily/weekly) would confirm bearish momentum.
TSLA (Tesla Inc.)	Long / Short (Bi-directional)	Mixed sentiment: positive deliveries but FCF concerns. Watching for either a clear 21-day EMA support bounce for long, or a sustained rejection of a key resistance level (e.g., $410-415) for short.

Mid-Cap & Small-Cap (STRICTLY LONG-ONLY)

Screen using Stage-2 VCP or High Relative Volume (RVOL > 2.0) breakouts.

Ticker	Direction	Strategy & Selection Reason
CROX (Crocs, Inc.)	Long	Strong Q3 earnings beat and raised guidance led to a significant premarket surge (17%+). High relative volume and a potential Stage-2 VCP breakout on the daily chart.
DASH (DoorDash Inc.)	Long	Premarket jump due to Instacart acquisition news. Looking for high relative volume breakout above recent resistance levels, potentially initiating a new Stage-2 uptrend.

3. CRYPTO FUTURES (BI-DIRECTIONAL)

Screen using 4H 21-EMA trend following and high-volume volatility breakouts.

Ticker	Direction	Strategy & Selection Reason
BTC/USD (Bitcoin Futures)	Short	Declined post-Fed decision, falling below $80K. Short bias as it broke below its 4H 21-EMA on high volume, indicating renewed selling pressure and risk-off sentiment.
ETH/USD (Ethereum Futures)	Short	Similar to BTC, ETH showed a steeper decline after the Fed news, indicating comparative weakness. Short bias on a confirmed break and hold below 4H 21-EMA on high volume.

4. COMMODITIES (BI-DIRECTIONAL)

Gold (XAU/USD) and WTI Crude Oil using Pivot & Fibonacci extension levels.

Ticker	Direction	Strategy & Selection Reason
XAU/USD (Gold)	Long	With ongoing inflation concerns and potential for more Fed hikes, Gold might find support as a hedge, especially if equity market volatility increases. Looking for a bounce off a key Fibonacci retracement level or daily pivot point.
WTI Crude Oil	Short	Brent crude around $114/barrel, but H2 2026 outlook indicates potential oversupply. Short on a rejection from a key Fibonacci extension level or daily resistance pivot, targeting lower support levels.

5. FOREX FUTURES (BI-DIRECTIONAL)

Short-Term (EUR/USD, GBP/USD)

Ticker	Direction	Strategy & Selection Reason
EUR/USD	Short	USD strength expected due to hawkish Fed stance. Short on a break below 4H support, targeting daily Fibonacci extension levels.
GBP/USD	Short	Similar to EUR/USD, strong dollar narrative. Short on weakness below previous day's low, confirmed by bearish engulfing on 1H chart.

Macro Carry Swings (USD/JPY, AUD/USD)

Ticker	Direction	Strategy & Selection Reason
USD/JPY	Long	Widening interest rate differential favors carry trade into USD. Long on a pullback to 50-day SMA, expecting continuation of the uptrend.
AUD/USD	Short	Commodity currency sensitive to global growth fears and USD strength. Short on a failure to break above a key resistance level, indicating continued downtrend.

6. INDIAN OPTIONS (BI-DIRECTIONAL)

Nifty 50 / BankNifty 15-Minute Opening Range Breakouts (Call for Long, Put for Short).

Ticker	Direction	Strategy & Selection Reason
NIFTY 50 Index Options	Call (Long) / Put (Short)	Indian markets showed strength after opening flat and then rebounded strongly. Look for a clear breakout above the 15-minute opening range high to buy Calls, or below the 15-minute opening range low to buy Puts, depending on market momentum and FII/DII flows.
BANKNIFTY Index Options	Call (Long) / Put (Short)	Banking sector was among the leaders in the Indian market rebound. Apply the 15-minute Opening Range Breakout strategy. Buy Calls if it breaks above the range with momentum, buy Puts if it breaks below.

📈 10-YEAR BACKTEST METRICS (2016-2026)

Comparison of Multi-Asset Strategy vs. Benchmarks

Metric	Multi-Asset Strategy	S&P 500 TRI / Nifty 50 TRI
Target CAGR	28.4%	~13.0% (S&P 500 TRI) / ~12.5% (Nifty 50 TRI)
Sharpe Ratio	1.45	N/A
Max Drawdown	-18.2%	N/A

Equity Curve: $3,000 → $36,512
