Current Session Highlight:  New York Session Pre-Open Briefing (1 Hr Before Open)

Session News Focus: Wall Street pre-market movers, US Federal Reserve news, mega-cap US stocks (NVDA, MSFT, TSLA), and WTI Crude Oil catalysts.

SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The US Federal Reserve unanimously raised interest rates by 0.25 percentage points to a target range of 3.75% to 4% in September 2026, the first hike since July 2023, to combat elevated inflation. Productivity growth is strong, and a pause in October is anticipated.
- Markets expect a 25-basis-point rate hike from the European Central Bank (ECB) to 2.50%, with focus on President Lagarde's guidance amidst surging energy prices.
- The Bank of Japan (BoJ) increased its benchmark interest rate to 1.25%, its highest since 1995, with Governor Ueda signaling further hikes are probable.
- Global inflation remains elevated, largely driven by energy prices, with core inflation being a key concern for central banks.
- High government debt and the increasing influence of non-bank financial institutions (NBFIs) may complicate future crisis management for central banks.
- The Indian Rupee has depreciated against the US Dollar due to elevated oil prices and ongoing foreign fund outflows.

2. US & European Markets

- US stock indexes demonstrated support from major technology companies like Nvidia, Meta Platforms, and Microsoft on Tuesday. The Dow Jones Industrial Average gained 0.18%, the S&P 500 rose approximately 0.7%, and the Nasdaq Composite advanced about 1%, reaching a new record high.
- NVIDIA (NVDA) showed a pre-market gain of 0.64% at \$240.43 as of 5:00 AM EST on October 6, following news that its AI boom might be underestimated by analysts. The stock recently hit an all-time high.
- Microsoft (MSFT) was up 1.36% in pre-market at \$519.77 as of October 2, and traded with strong volume today. Analysts maintain a "buy" rating with a median price target of \$582.66.
- Tesla (TSLA) was slightly down by 0.43% in pre-market at \$369 as of October 5, despite reporting strong Q3 delivery beats in recent sessions and showing a "bullish crossover" technical signal.

3. Indian Markets & Dalal Street

- Dalal Street is poised for a positive open, with GIFT Nifty up 0.33% at 22,650, indicating potential relief for Indian equities after an eight-week losing streak.
- The Nifty closed 0.6% higher at 22,556 on Monday, breaking a four-session decline.
- Favorable Q2 business updates and robust bank results are contributing to a positive market sentiment.
- Foreign Portfolio Investors (FPIs) net sold Indian shares worth Rs 4,699 crore on Monday, while Domestic Institutional Investors (DIIs) were net buyers at Rs 5,182 crore, offsetting some FII outflows.

4. Commodities & Crypto Wire

- WTI Crude Oil is trading around \$89.00, having edged higher in the Asian session but remaining near a four-week low. It has dropped below \$90 and \$88 (200MA support) on Tuesday, closing at \$87.51.
- OPEC+ has agreed to maintain current oil production targets for November. Geopolitical risks in the Middle East offer some price support, but resilient exports and a G7 emergency stockpile release are easing supply concerns.
- Gold prices were largely unchanged on Tuesday, as a stronger dollar counteracted easing expectations of a Federal Reserve rate hike. Gold rallied 1.22% to \$4,176.10 on Monday, supported by central bank diversification efforts.
- The U.S. Commodity Futures Trading Commission (CFTC) proposed new regulations for digital asset markets, aiming to allow US crypto exchanges to opt into a federal regulatory framework.
- The SEC also proposed new crypto custody rules, which could enhance institutional adoption by providing regulatory clarity.
- Wall Street firms, including Morgan Stanley, are actively expanding into digital assets and blockchain technology, driving broader crypto adoption.
