Session News Focus: Wall Street pre-market movers, US Federal Reserve news, mega-cap US stocks (NVDA, MSFT, TSLA), and WTI Crude Oil catalysts.

SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The Federal Reserve implemented its first interest rate hike since July 2023, raising the benchmark rate by 0.25 percentage points to counter resurgent inflation, largely driven by energy prices.
- Despite the recent hike, Fed officials are indicating a pause in October, with market expectations shifting towards a next rate increase in December.
- The US Dollar has surged to a 17-month high, attributed to a bond market rout and concerns over French fiscal stability impacting the Euro.
- Tokyo's core inflation saw a significant jump in September, bolstering arguments for further rate hikes by the Bank of Japan.
- Speeches from various Federal Reserve officials throughout the week have focused on the economic outlook, monetary policy, and the growing influence of AI.
- European markets are bracing for their worst weekly performance since April, heavily impacted by rising EU bond yields.

2. US & European Markets

- US futures show a mixed but generally positive pre-market, with the S&P 500 (SPY) up 0.22% and Nasdaq 100 (QQQ) up 0.41%, while the Russell 2000 (IWM) is slightly down 0.22%.
- Nvidia (NVDA) is exhibiting strong pre-market gains, up approximately 0.91%, continuing to benefit from robust AI spending in the wake of Micron's positive fiscal Q4 results. Analysts maintain "Strong Buy" ratings, projecting significant upside.
- Microsoft (MSFT) is also trading higher in the pre-market, up 0.50%, following a series of bullish analyst upgrades and price target increases, with AI initiatives being a key growth driver.
- Tesla (TSLA) shows a modest pre-market increase of around 0.34%. However, the stock faces headwinds after JPMorgan downgraded its price target, with concerns mounting over anticipated lower Q3 delivery figures, potentially leading to its worst weekly performance in two months.
- Overall, the US and Canadian stock markets are experiencing "bad breadth," indicating that a concentrated number of stocks are driving index gains.
- Nike shares are down sharply by 9% in pre-market trading due to a revenue miss and weak forward guidance.

3. Indian Markets & Dalal Street

- Indian equity markets are closed today, October 2, 2026, for Gandhi Jayanti.
- Prior to the holiday, both Sensex and Nifty were experiencing declines, down 0.78% and 0.88% respectively, reflecting a broader market downturn.
- The Indian market has endured a significant correction, with a reported Rs 26 lakh crore wiped out in eight weeks, primarily due to soaring bond yields which are seen as a larger threat than elevated oil prices.
- Foreign Portfolio Investors (FPIs) have withdrawn a record Rs 3 lakh crore from Indian equities over the past nine months. While Foreign Currency Non-Resident (FCNR) inflows have provided some rupee stability, sustained external stability hinges on renewed FII flows.

4. Commodities & Crypto Wire

- **Crude Oil:** WTI Crude Oil is slightly down at \$92.64 but has seen upward pressure, recently hovering around \$102, supported by geopolitical tensions between the US and Iran and China's fuel consumption curbs. President Trump's rejection of a diplomatic push could lead to higher oil prices.
- **Gold:** Gold prices are slipping ahead of the upcoming US Jobs data and are on track for a second consecutive weekly loss. The MCX (Multi Commodity Exchange) is closed today for Gandhi Jayanti.
- **Crypto:** The US SEC has proposed new rules to modernize the custody of crypto assets for registered investment advisers and regulated funds, acknowledging that existing regulations have lagged Bitcoin's rapid growth. This move is anticipated to create a clearer regulatory framework and potentially accelerate mainstream adoption.
- The US Senate passed the GENIUS Act, a bipartisan bill for stablecoin regulation, now moving to the House. States are increasing enforcement actions against crypto firms operating without proper licenses. Bitcoin is showing positive movement, up 0.93%.

TSLA	Short	\$356.50	\$350.00	\$359.50	50-day SMA Rejection / Mega-cap Growth Leader: Despite a slight pre-market uptick, TSLA faces significant bearish sentiment due to JPMorgan's price target cut and concerns over potentially weak Q3 delivery numbers, indicating a possible rejection of resistance.
