Date: Friday, August 16, 2026

Session Highlight: London Session Pre-Open Briefing (1 Hr Before Open)

Session News Focus: European macroeconomic releases, ECB/BOE news, Forex short-term futures (EUR/USD, GBP/USD), and Gold (XAU/USD) supply/demand zones.

SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST (Simulated for August 16, 2026)

1. Global Macro & Central Banks

- US Inflation Data & Fed Policy:** Markets are cautiously awaiting fresh impulses from upcoming US inflation data, which is a critical determinant for the Federal Reserve's policy path and, consequently, currency movements. The FOMC minutes are also under close scrutiny for further signals on the Fed's outlook.
- ECB & BOE Stance:** The Bank of England (BoE) is widely anticipated to deliver another rate hike this year, lending support to the Sterling. Conversely, the European Central Bank's (ECB) stance and broader Eurozone economic data remain key swing factors, particularly for the GBP/EUR pair.
- Currency Drivers:** The EUR/USD pair is currently exhibiting range-bound trading dynamics, largely influenced by upcoming US inflation figures, with its next significant move expected post-release. On August 15, 2026, EUR/USD was trading around 1.1573, fluctuating within a narrow band of 1.1531-1.1589. Similarly, GBP/USD, currently around 1.3526, is highly sensitive to new data points rather than strong directional trends, balancing BoE hawkishness against US dollar weakness stemming from recent labor market data.

2. US & European Markets

- US Equities Pullback:** US major indices, including the Dow, Nasdaq, and S&P 500, experienced a downturn on Friday, extending a multi-day pullback. This weakness is attributed to persistent investor anxiety regarding the Federal Reserve's potential tapering of its quantitative easing program. The S&P 500 has declined over 2% in the past five trading sessions.
- European Market Resilience:** In contrast to the US, European markets generally showed resilience, trading mostly higher on Friday.
- European Economic Headwinds:** Europe is grappling with its fifth heatwave of the year, leading to significant business losses, especially within the hospitality sector, and exposing a critical "insurance gap." This climate-related disruption is forecast to negatively impact regional economic output.

3. Indian Markets & Dalal Street

- Indian Equities Under Pressure:** Indian benchmark indices, Sensex and Nifty, concluded Friday's session lower. This decline was primarily driven by elevated crude oil prices and ongoing geopolitical tensions involving the US and Iran. The Nifty 50 closed at 24,366, a 30-point drop, while the Sensex fell 71 points to 78,009. Broader markets also saw a decline.
- FII/DII Flows:** Domestic Institutional Investors (DIIs) demonstrated consistent buying interest; however, Foreign Institutional Investors (FIIs) were net sellers, offloading equities worth ₹510.69 crore on Thursday.
- Technical Levels:** Key support for the Nifty 50 is identified at 24,250 and 24,000, with resistance levels at 24,600 and 24,800. Bank Nifty, while facing rejection near the 58,000-58,300 zone, showed signs of buying interest as it recovered from its weekly lows.

4. Commodities & Crypto Wire

- Crude Oil Surges:** Crude oil prices remain elevated, largely due to escalating US-Iran tensions and concerns over the Strait of Hormuz. Brent crude is trading around \$87.15 per barrel, while WTI crude has rallied into a "war range" of \$85-\$105, with identified technical support at \$70-\$75 and resistance at \$95-\$100.
- Gold Gains Momentum:** Gold (XAU/USD) closed Friday with gains, despite broader equity market weakness. Spot gold reached \$4,404.99 on August 12, nearing a ten-week high as traders reduced expectations of a September Federal Reserve rate hike. Gold is consolidating above the \$2,565 support zone, with key resistance levels at \$4,650 and \$4,700. Daily pivot points are around 4431.96 / 4400.40.
- Crypto Regulatory Uncertainty:** The cryptocurrency market is navigating significant regulatory uncertainty. The SEC unexpectedly canceled a crucial meeting scheduled for August 14, which was intended to propose a new "Regulation Crypto" framework, leaving a regulatory "vacuum." The CLARITY Act, a legislative alternative, has also stalled in the Senate. Despite this, several crypto firms are still actively pursuing expansion into traditional banking services.
