SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The July U.S. Consumer Price Index (CPI) data is set for release today at 8:30 AM ET, a critical event given markets are split on a potential September Federal Reserve interest rate hike.
- Economists anticipate a modest increase in monthly inflation, with headline CPI projected to rise 0.1% and core CPI by 0.2%, potentially moderating July's core inflation to 2.5%.
- Boston Fed President Susan Collins has indicated openness to supporting a September rate hike if inflation persists at elevated levels.
- Despite the Fed keeping rates at approximately 3.6% in its previous meeting, a 9-3 vote reveals significant division within the committee regarding future policy.
- Rising crude oil prices are exacerbating inflation concerns and pushing Treasury yields higher.
- Indian retail inflation accelerated to 4.45% in July, exceeding the Reserve Bank of India's (RBI) target due to increasing food prices. The RBI has revised its inflation forecast for FY27 downwards to 5%.
- The U.S. dollar has stabilized at weaker levels in anticipation of the CPI report.

2. US & European Markets

- U.S. stock futures are showing mixed to slightly positive movements ahead of the crucial CPI data release, with S&P 500 futures up 0.2-0.3% and Nasdaq 100 futures gaining 0.4-0.65%.
- Strong earnings reports from AI infrastructure companies like CoreWeave and Super Micro Computer are bolstering sentiment in the tech sector during pre-market trading.
- ****NVIDIA (NVDA):**** Announced a \$500 billion AI infrastructure financing platform in collaboration with six major financial institutions, aiming to establish AI computing power as a financiaible asset. The company also reported strong quarterly earnings and revenue that beat estimates, with a year-over-year revenue increase of 85.2%. Analysts view NVDA's technical outlook as solid, with bullish signals across key indicators.
- ****Microsoft (MSFT):**** Wells Fargo has raised its price target for Microsoft to \$700 from \$650, maintaining an overweight rating, citing strong growth in its AI and cloud segments.
- ****Tesla (TSLA):**** Hyperion Asset Management increased its stake, but the company missed Q2 earnings per share estimates despite revenue exceeding forecasts. Elon Musk's vision for integrating Starlink into future cars is seen as a significant expansion of Tesla's business model. Technical analysis indicates a slow recovery in early August, with key resistance at the 200-period moving average.
- European markets are mixed, with Germany's DAX advancing, while France's CAC 40 and Britain's FTSE 100 show slight declines or remain flat.

3. Indian Markets & Dalal Street

- Indian benchmark indices, Sensex and Nifty, concluded lower for the second consecutive session, driven by elevated crude oil prices and selling pressure on Tata Group stocks.
- The Sensex closed down 0.24% at 77,966.35, and the Nifty 50 declined 0.15% to 24,435.95.
- The resignation of Tata Sons Chairman N Chandrasekaran contributed to a notable fall in Tata Group equities.
- The Nifty IT sector was the weakest performer, dropping by 1.99%, whereas the Nifty PSU Bank sector saw gains of 1.73%, supported by buying interest in public sector lenders.
- Foreign Institutional Investors (FIIs) and Domestic Institutional Investors (DIIs) recorded net inflows of ₹283.32 crore on August 11, reflecting continued institutional confidence.
