CURRENT SESSION HIGHLIGHT: New York Session Pre-Open Briefing (1 Hr Before Open)

SESSION NEWS FOCUS: Wall Street pre-market movers, US Federal Reserve news, mega-cap US stocks (NVDA, MSFT, TSLA), and WTI Crude Oil catalysts.

SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The European Central Bank (ECB) is widely expected to raise its key interest rate by 25 basis points to 2.5% on September 10, 2026, driven by persistent eurozone annual inflation, which hit 3.3% in August. Elevated energy prices stemming from the Middle East conflict continue to exert inflationary pressure.
- For the US, the Federal Open Market Committee (FOMC) meeting is scheduled for September 15-16, 2026, with the interest rate decision on September 16. Markets are closely watching whether the Federal Reserve will hold rates or implement a 25 basis point hike (current range 3.50%-3.75%), especially after strong August employment data and hawkish statements from Fed Chair Kevin Warsh, which have increased the market-implied odds of a September hike to around 60%. The Fed has adopted a data-dependent approach with less forward guidance, making upcoming economic reports crucial.
- Globally, rising bond yields in both Europe and the US reflect anticipation of further monetary tightening and the sustained impact of high energy prices.
- The Indian Rupee strengthened in early trade, rising 4 paise to 94.39 against the US Dollar.

2. US & European Markets

- US stock futures indicate a mixed to negative pre-market sentiment, with futures for the S&P 500 (SPY), Nasdaq 100 (QQQ), and Dow Jones (DIA) all trending lower.
- Notable pre-market movers include Immuron (IMRN) and American Outdoor Brands (AOUT) showing gains, while BioXcel Therapeutics (BTAI) and Lululemon (LULG) are among the losers.
- Nvidia (NVDA) is in the news for a reported \$12.9 billion acquisition of AI platform Hugging Face, signaling continued strong growth in the semiconductor and AI sectors.
- Concerns over potential US interest rate hikes and ongoing geopolitical tensions in the Middle East are broadly weighing on global market sentiment. Novartis shares saw a significant drop of 10% following a failed drug trial.

3. Indian Markets & Dalal Street

- Indian equity benchmarks, Sensex and Nifty, are trading lower today, with the Sensex down over 500 points and Nifty below the 23,700 mark.
- Foreign Institutional Investors (FIIs) have reportedly resumed selling, withdrawing ₹7,443 crore from equities in the first week of September.
- While large-cap indices are under pressure, mid-cap and small-cap segments have shown mixed to relatively better performance.
- Recent corporate earnings reports show varied performance; some companies like Puravankara and PVP Ventures posted strong Q1FY27 profit growth, while others such as Cochin Shipyard experienced margin compression.
- Sectoral analysis shows Nifty IT, Nifty Oil & Gas, Nifty Private Banks, and Nifty Auto leading losses, whereas Nifty Pharma, Nifty Metals, and Nifty Media are showing resilience or gains. PSU, defense, and capital expenditure (capex) related stocks demonstrated strong momentum in the preceding years (2023-2025).

4. Commodities & Crypto Wire

- **WTI Crude Oil:** OPEC+ countries, including Saudi Arabia and Russia, have agreed to maintain October 2026 oil production levels unchanged from September, aiming to stabilize the market amidst uncertainty caused by ongoing conflicts in West Asia and disruptions in the Strait of Hormuz. Brent crude prices are reported to be near \$100 per barrel.
- **Gold (XAU/USD):** Gold prices are under pressure, currently around \$4,406.11 per ounce, influenced by a stronger US Dollar and increased expectations of a Fed rate hike following robust US jobs data. Geopolitical tensions typically provide safe-haven demand for gold, but current monetary policy expectations are a strong counteracting force.
- **Crypto:** Bitcoin (BTC) is trading near the \$78,000-\$79,000 support zone after a rejection from highs near \$82,000, but it continues to hold above key uptrending moving averages. Ethereum (ETH) is holding crucial support at \$2,450 as it attempts to reclaim the \$2,500 level, with mixed ETF flow dynamics. Institutional demand for crypto appears to be recovering, as evidenced by nearly \$1 billion in spot Bitcoin ETF inflows last week. Regulatory developments include states increasing enforcement against unlicensed crypto firms, and the US Senate passing the "GENIUS Act" for stablecoin regulation, which now moves to the House. However, concerns remain about potential delays in comprehensive US crypto regulation if the CLARITY Act fails to pass this congressional session.

AUD/USD	0.6650	Commodity-linked currency, also influenced by broad USD strength. Long-term weakness if global growth concerns persist and USD strengthens.	Short on rallies to 0.6700	Target: 0.6580	Stop Loss: 0.6730

INDIAN OPTIONS (BI-DIRECTIONAL)

Index	Strategy & Selection Reason	Directional Bias (Intraday)	Execution Note
Nifty 50	15-Minute Opening Range Breakout (ORB). Given Nifty's current weakness, a short bias may be prevalent, but ORB can capture initial directional moves.	Short-biased (Put Option) / Long (Call Option)	Long: Buy Call Option if 15-min candle breaks and sustains above opening range high. Short: Buy Put Option if 15-min candle breaks and sustains below opening range low. Strict stop loss at breakout failure.
BankNifty	15-Minute Opening Range Breakout (ORB). BankNifty often exhibits higher volatility and clear intraday trends, making ORB effective.	Short-biased (Put Option) / Long (Call Option)	Long: Buy Call Option if 15-min candle breaks and sustains above opening range high. Short: Buy Put Option if 15-min candle breaks and sustains below opening range low. Strict stop loss at breakout failure.
