SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The European Central Bank (ECB) raised interest rates by 25 basis points in September, citing ongoing inflation pressures and projecting headline inflation to average 3.0% in 2026, 2.5% in 2027, and 2.1% in 2028. Commerzbank further suggests potential for additional ECB rate hikes, forecasting euro area headline inflation near 4% in coming months and core inflation exceeding 3% over the next year. The euro area interest rate currently stands at 2.65% and is expected to reach 2.90% by the quarter's end. ECB chief economist Philip Lane has also advocated for strengthening the euro's global role through liquidity safety nets for foreign countries, noting significant interest in these expanded facilities.
- The Bank of England (BoE) maintained its Bank Rate at 3.75% in September, although rising inflation in the UK could necessitate future rate increases to achieve the 2% target.
- US stock futures advanced as market participants largely expect the Federal Reserve to hold interest rates steady in October, while pricing in an 89.4% likelihood of a rate hike in December.

2. US & European Markets

- US markets saw a rebound, with the Nasdaq climbing over 1% on Monday, led by technology stocks in anticipation of crucial AI-related earnings reports this week from companies like Meta, Tesla, Lam Research, and Texas Instruments. The S&P 500 rose 0.41%, and the Nasdaq Composite gained 1.11% on Monday.
- Conversely, European equities and the euro experienced declines amid political unrest in France, which has exacerbated concerns regarding the country's fiscal health.

3. Indian Markets & Dalal Street

- Indian indices, Sensex and Nifty, surged by almost 1% on Wednesday, fueled by robust Q2 earnings, strength in IT stocks, a strengthening rupee, and attractive valuations in large-cap segments. Nifty surpassed the 23,050 mark.
- However, elevated crude oil prices and increasing bond yields remain significant headwinds for the Indian market.
- Bajaj Finance shares experienced a 3% dip following a 29% year-on-year increase in Q2FY27 net profit to Rs 6,367 crore.
- SBI is conducting an investigation into a potential dark web leak affecting 3,897 customer records.

4. Commodities & Crypto Wire

- WTI Crude Oil continued its upward trajectory on Wednesday, approaching $99.00, driven by escalating fears of supply disruptions due to increased vessel attacks in the Strait of Hormuz and threats against Saudi oilfields. Efforts for a US-Iran peace deal are reportedly failing. OPEC has revised down its oil demand forecast, yet supply concerns persist, keeping prices elevated.
- Gold (XAU/USD) has been influenced by market dynamics, slipping as AI stocks gained and extending losses on Tuesday as rising oil prices bolstered expectations of Federal Reserve rate hikes. Gold is currently testing a crucial demand zone, having defended the $4,000 level.
- Silver saw a rebound on the back of a weaker US Dollar, though potential Fed rate hikes are limiting its recovery.
