📰 SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- **US Federal Reserve:** The Federal Reserve maintained its key interest rate at 3.75-4% in late October (October 28, 2026), despite persistent inflation, opting to await further economic data before future policy adjustments. Two committee members dissented, advocating for a rate hike. Key inflation reports, including the October US CPI (November 10) and PCE (November 25), are highly anticipated to inform the Fed's December meeting.
- **European Central Bank (ECB):** The ECB also held interest rates steady recently, though President Christine Lagarde announced an early departure, alluding to difficulties maintaining political neutrality.
- **Bank of Japan (BoJ):** Japan's central bank has reportedly achieved its 2% inflation target after nearly 14 years and is expected to pursue further monetary tightening in December and March.
- **Other Central Banks:** The Riksbank (Sweden) is expected to hike rates this week, while the Norges Bank (Norway) may signal a December hike. The Reserve Bank of Australia is also projected to increase rates.
- **Global Economy:** Global growth is forecast at 3.3% for 2026, with a general expectation for inflation to ease, though US inflation is predicted to decrease more gradually towards target levels.
- **Currency (USD/INR):** Immediate resistance for the USD/INR pair is observed at 95.00-95.30, with support at 94.90.

2. US & European Markets

- **US Premarket Movers:** Intel (INTC) is a significant pre-market decliner, down approximately 25.8% to $68.31, with substantial volume, extending previous losses attributed to a weakening PC market and a subdued earnings outlook. Leveraged ETFs tracking Intel, such as LINT and INTW, are experiencing even sharper drops. Nvidia (NVDA) is down 2.28% and Amazon (AMZN) is down 4.63% in pre-market trading. Notable pre-market gainers include Nuburu (BURU) and Smart Logistics Global (SLGB).
- **Semiconductor Sector:** The semiconductor industry recently saw a sharp downturn, fueled by concerns regarding the profitability of AI investments and deteriorating cash flow among major tech companies, despite robust AI demand. Conversely, Taiwan Semiconductor Manufacturing Company (TSMC) reported strong Q3 earnings, with high-performance computing as a key growth driver, and anticipates strong Q4 demand. ASML also posted record Q3 revenue and expects high future demand. The market is keenly watching whether substantial AI investments will translate into tangible profits.
- **Broader US Market:** The Nasdaq Composite recently fell 2.86%, and the Philadelphia Semiconductor Index dropped 7.20%. Pre-market futures indicate a weaker open, with S&P 500 futures down 1.06%, Nasdaq 100 futures down 2.53%, and Dow Jones Industrial Average futures down 0.18%.
- **European Markets:** The Tel Aviv 35 Index has declined 3.5% since a recent election, with technology stocks particularly under pressure.

3. Indian Markets & Dalal Street

- **Index Performance:** Indian equity benchmarks, Nifty and Sensex, posted a firm recovery of nearly 2% last week, buoyed by renewed foreign institutional investor (FII) buying, falling bond yields, and positive domestic earnings. Nifty advanced 0.51% to 23,053 on the last trading day, while Sensex rose 0.42% to 74,459.
- **Broader Market Dynamics:** The Nifty Midcap 100 and Nifty Smallcap 100 indices outperformed benchmarks during the week, gaining 2.69% and 4% respectively. However, broader markets experienced a sharp sell-off on Friday, with mid-cap and small-cap indices declining by up to 2%.
- **Institutional Flows:** FIIs were net buyers last week, acquiring shares worth Rs 6,304.67 crore, breaking a 10-week selling streak. Domestic institutional investors (DIIs) also bought shares worth Rs 3,109.79 crore.
- **Corporate Earnings:** India's three major state-run fuel retailers (IOC, BPCL, HPCL) reported a combined net profit of Rs 30,106 crore in Q2 FY27, driven by strong refining margins and inventory gains, with IOC achieving its highest-ever standalone quarterly net profit. Reliance Industries (RIL) saw a 40.64% year-over-year increase in consolidated net profit for Q2 FY27, reaching Rs 25,548 crore. ITC is scheduled to release its earnings today, November 1, 2026.
- **Sectoral Momentum:** Pharma and healthcare sectors led the gains last week. The Nifty IT index rallied 18% in October, with analysts suggesting a sustained leadership cycle due to potential global capital reallocation from AI and semiconductor stocks into Indian IT. Metals, FMCG, and autos also performed well, while cement and oil & gas lagged.
- **Seasonal Outlook:** Historically, November and December have been strong months for the Nifty 50, showing average returns of 2.5% and 2.6% respectively over the past 25 years.

4. Commodities & Crypto Wire

- **WTI Crude Oil:** OPEC+ has provisionally agreed to maintain December production targets unchanged, aligning with market expectations as the alliance focuses on setting 2027 quotas. This decision comes amid geopolitical tensions and supply disruptions stemming from the Iran war. An existing production cut of approximately 2 million barrels per day (bpd) will remain in effect through the end of 2026. Crude oil prices surged above $117 a barrel in October.
- **Gold (XAU/USD):** Gold prices experienced a significant decline in October, hitting a four-month low and reverting to December 2025 levels. This downturn is attributed to stronger-than-expected US GDP data, rising oil prices, and the Federal Reserve's hawkish stance on future rate hikes. International gold prices have fallen below $3,900 per ounce. Gold demand in India is anticipated to increase due to the upcoming Dhanteras festival.
- **Crypto Market:** Cryptocurrency exchange Binance suffered a $6.3 billion hack, reportedly linked to North Korean actors, which caused a drop in Bitcoin and Ether prices. Binance has announced plans to reinstate withdrawal features for major cryptocurrencies today (November 1, 2026) after implementing security enhancements, confirming it will cover all losses. Cardano is progressing with its latest CIP update, which includes reviews of quantum security and stablecoin regulations. The EU's MiCA regulation has led to major exchanges in the European Economic Area ceasing USDT sales since October 8, 2026, due to its lack of e-money token authorization, with USDC and EURC emerging as compliant alternatives. Bitcoin traders are closely monitoring the forthcoming US October CPI report.
