SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- US President Trump announced a suspension of military strikes on Iran and a shift toward diplomatic negotiations, easing geopolitical tensions. This development significantly impacted oil prices and global risk sentiment.
- The Federal Reserve left interest rates unchanged last week, though three officials dissented, advocating for a hike. Markets are now pricing in a 63-65% chance of a September hike, not a cut.
- The US Treasury, in coordination with the Bank of Japan, intervened in the foreign exchange market on August 1st by buying Japanese Yen. Japan's top currency official also stated that Japan will coordinate Yen policy with the Bank of Japan, leading to JPY volatility and a jump in Japan's short-term government bond yields.
- The Reserve Bank of India's (RBI) policy outcome is awaited, with interest rates widely expected to remain unchanged. The RBI has also granted an expanded Authorised Dealer Category II (AD II) license to WSFx Global Pay Ltd.
- Australia's Cotality Home Value Index fell 0.7% in July 2026, the sharpest drop since December 2022, due to higher borrowing costs and weak sentiment.
- Swiss inflation fell in July despite a rebound in global energy prices.

2. US & European Markets

- US stock futures rose in pre-market trading, picking up from Friday's session, largely due to the de-escalation of Iran tensions and falling oil prices. Dow futures rose 1.02%, S&P 500 futures rose 0.65%, and Nasdaq 100 futures rose 0.35%.
- The S&P 500 closed 0.70% higher on Friday, marking its first winning week in three. Roughly 85% of S&P 500 companies reporting Q2 earnings have beaten estimates, with aggregate profit growth tracking above 47%.
- Amazon (AMZN) saw a significant surge after reporting stronger-than-expected Q2 profit, with AWS revenue growing 37% year-over-year. Microsoft (MSFT) also rose about 1.5% premarket, indicating continued support for heavyweight tech stocks from AI trading sentiment.
- Apple (AAPL) experienced weakness on Friday, contributing to a "record slide" for the stock. Meta Platforms (META) gave a disappointing quarterly revenue forecast and reported its lowest free cash flow in years, with shares sliding about 8%.
- Palantir (PLTR) is scheduled to report earnings after the market close today. Other companies reporting this week include SpaceX (SPCX), Advanced Micro Devices (AMD), McDonald's (MCD), and Disney (DIS).
- In Europe, Germany's DAX gained 1.3%, and France's CAC 40 climbed 1%.
- Key US economic data expected this week includes the ISM Manufacturing PMI, JOLTS (Job Openings and Labor Turnover Survey), weekly initial jobless claims, and Friday's July jobs report.

3. Indian Markets & Dalal Street

- Indian benchmark indices surged in early trade and closed significantly higher on Monday, extending a four-day winning streak. The Sensex rose 544.39 points (0.7%) to 78,639.03, and the Nifty50 gained 390.70 points (1.6%) to 24,774.30. This was attributed to easing crude oil prices, reduced geopolitical tensions, improved global cues, and renewed foreign fund inflows.
- The rupee closed 12 paise higher against the US dollar at 95.31.
- Foreign Institutional Investors (FIIs) bought equities worth Rs 277.48 crore on Friday. Domestic Institutional Investors (DIIs) held a record 21% stake in Nifty 500 companies as of June 2026, while FII ownership fell to a new low of 17%.
- Top Nifty50 gainers included InterGlobe Aviation (IndiGo), Infosys, Tata Consultancy Services (TCS), Bajaj Finserv, and ITC. Sun Pharma shares dropped almost 2%.
- Broader markets also performed well, with the Nifty MidCap and Nifty SmallCap indices settling 1.21% and 1.29% higher, respectively.
- Over 85 companies, including DLF, IREDA, Escorts Kubota, Jindal Stainless, and GlaxoSmithKline Pharmaceuticals, announced Q1 FY27 results today. Notable results: Glenmark Pharmaceuticals reported a sharp increase in net profit, and Blue Dart Express saw an 81.2% jump in Q1 profit. ITC reported a 15.6% decline in consolidated net profit.

4. Commodities & Crypto Wire

- WTI Crude Oil prices plummeted by over 8% to around \$79.5 per barrel, and Brent crude fell over 8% to around \$83.5 per barrel, following President Trump's decision to halt strikes on Iran and initiate diplomatic negotiations. OPEC+ also announced a production increase of 188,000 barrels per day starting in September, adding to the downward pressure.
- Gold prices were steady in the domestic retail market, with 24-carat gold at ₹14,422 per gm. Globally, Gold (XAU/USD) traded near \$4,064 per t.oz, up 0.12% from the previous day, consolidating ahead of key US economic data. Gold reached a fresh record high of \$4,069.99 on August 3, 2026, reflecting shifts in market expectations for US interest rates. Strong central bank buying (289 tonnes in Q2 2026) continues to provide long-term support for gold.
- The global cryptocurrency market cap stands at \$2.17 trillion, up by 0.30% over the last day.
- Bitcoin (BTC) is trading around \$62,647, down by -0.93% over the past 24 hours, and has been consolidating between \$62,300 and \$63,796. Bitcoin's price is stuck in a range as traders await new catalysts, reacting to continued spot ETF outflows (over \$265 million on Friday) and rising US Treasury yields.
- Market outperformers in crypto include BICO (+32%), WAXP (+19%), and TUT (+14%).
