📰 SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

Global Macro & Central Banks

- The global economy demonstrates resilience amidst geopolitical tensions and elevated energy costs, with AI-driven investments helping to temper inflation pressures.
- Central banks globally are adopting increasingly divergent and tighter monetary policies in response to persistent inflation.
- **US Federal Reserve:** Following a 25 bps hike on September 16 (first since July 2023), raising the federal funds target to 3.75%-4.00%, the Fed maintains a hawkish stance. Market expectations for an October 27-28 rate hike have risen to nearly 40% after a "hotter" than anticipated September CPI report.
- **European Central Bank (ECB):** The ECB raised key interest rates by 25 bps on June 11, with the deposit rate now at 2.25%. A restrictive stance continues due to Middle East conflict and energy price-driven inflation, with modest additional tightening likely.
- **Reserve Bank of India (RBI):** The RBI unanimously hiked the repo rate by 25 bps to 5.50% on October 7, shifting to 'calibrated tightening.' This first hike in almost four years reflects rising inflation risks and higher crude prices, with rate cuts "off the table" near-term and further hikes possible. India's FY27 GDP growth forecast was raised to 7.1%.

US & European Markets

- **Wall Street Outlook:** Q4 2026 begins with US stocks near record valuations, with the S&P 500's forward P/E around 22, above its 10-year average.
- **Mega-cap Tech/Semiconductors:** The AI investment boom continues to fuel exceptional earnings growth, extending beyond the core tech sector. Nvidia (NVDA) and Microsoft (MSFT) are noted for new AI chip developments.
- Market gains are heavily concentrated in a few mega-cap AI leaders, contributing disproportionately to overall market undervaluation, while broader market breadth remains poor.
- US equities ended Q3 with strong year-to-date gains, though persistent inflation, higher borrowing costs, and geopolitical uncertainty present risks.

Indian Markets & Dalal Street

- Indian benchmark indices, Sensex and Nifty 50, saw declines on October 12, influenced by inflation concerns, elevated crude oil prices, and sustained foreign outflows.
- **FII/DII Flows:** Foreign Institutional Investors (FIIs) remain net sellers in Indian equities, with recent outflows of ₹1,019.79 crore on October 14 and ₹1,709 crore on October 12. Domestic Institutional Investors (DIIs) have consistently provided strong counterbalance buying, absorbing foreign selling pressure and enhancing market resilience. DII ownership now slightly surpasses FII holdings.

Commodities & Crypto Wire

- **Crude Oil:** Geopolitical tensions in the Middle East significantly impact oil prices and global inflation. OPEC has revised down its 2026 oil demand outlook but anticipates record demand in 2027. OPEC+ maintained November quotas. J.P. Morgan forecasts Brent crude at $80/bbl for Q4 2026 and $78 at year-end, reflecting demand destruction.
- **Gold (XAU/USD):** Gold traded around $4,100 post-hotter US inflation data. Bank of America forecasts gold below $4,000 for Q4 2026 ($4,000/oz average) due to decreased demand (especially Indian imports down 77.8%) and potential ETF/central bank sales (e.g., Kazakhstan reducing reserves). Resistance is noted at $4,300-$4,400, with support at $3,900-$4,000.
- **Crypto:** Global crypto regulation is progressing into an implementation phase focusing on authorization and supervision. EU lawmakers are integrating crypto-asset risks into anti-corruption strategies, and Greece has drafted a 10% crypto capital gains tax. The SEC proposed "Regulation Crypto Assets" in August 2026 for investment contracts involving crypto assets, with comments due October 20.
- Bitcoin and Ethereum ETFs experienced substantial weekly outflows of $1.22 billion (Oct 5-9) driven by rising Treasury yields and inflation concerns. Despite this, analysts are "cautiously bullish" on Bitcoin, Ethereum, and NEAR Protocol, citing improving market structure and institutional adoption. Bitcoin is consolidating near $85K.
