SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- **US Federal Reserve (FOMC):** The FOMC recently raised the federal funds target range by 0.25 percentage point to 3.75%-4.00% in September 2026, marking the first increase since 2023. This unanimous decision was driven by concerns about elevated inflation and solid economic activity. Most participants project at least one additional increase this year, signaling a strong near-term hawkish stance.
- **European Central Bank (ECB):** The ECB raised its key interest rates by 25 basis points at its September meeting, the second hike since the US-Iran war began. ECB President Christine Lagarde emphasized a meeting-by-meeting approach, noting downside risks to growth and upside risks to inflation. Oil prices are becoming an increasingly important indicator for the ECB.
- **Reserve Bank of India (RBI):** The RBI absorbed ₹75,026 crore through an overnight Variable Rate Reverse Repo (VRRR) auction amid surplus liquidity. The central bank continues these auctions to manage liquidity and align money market rates. Banks will remain open on Sunday, September 27, 2026, ahead of a proposed three-day nationwide strike.
- **Currency Drivers:** The US Dollar (USD) continues to strengthen due to the Federal Reserve's hawkish outlook, which is undermining non-yielding assets like gold. The Euro is struggling against the strong USD amidst hawkish Fed signals and German political risks.

2. US & European Markets

- **Wall Street Futures & Pre-market movers:** US stock futures are mixed, with S&P 500 and Dow Jones futures showing gains, while Nasdaq 100 and Russell 2000 are declining. Premarket gainers include Wheeler Real Estate Investment Trust, Inc. (WHLR) and Professional Diversity Network, Inc. (IPDN), while Jaguar Health, Inc. (JAGX) and Biomea Fusion, Inc. are among the losers.
- **Mega-cap tech & Semiconductor developments:** Nasdaq Composite hit a new record high. Apple's market capitalization briefly surpassed \$5 trillion. Tesla (TSLA), Nvidia (NVDA), and Apple (AAPL) saw gains recently, while Microsoft (MSFT) slipped. The semiconductor sector remains robust, with the Philadelphia Semiconductor Index jumping, and memory-chip names like Micron Technology (MU) surging. AMD recently joined the \$1 trillion market cap club. There's a notable shift as the "Magnificent Seven" stocks, including NVDA and MSFT, have been lagging the broader S&P 500, indicating a potential rotation. Investment in AI infrastructure and quantum manufacturing continues to drive semiconductor deals.

3. Indian Markets & Dalal Street

- **Sensex/Nifty updates:** Indian benchmark indices are trading higher today, led by Metal, Realty, and FMCG sectors. Sensex is up by 350 points, and Nifty is above 23,400.
- **Corporate earnings:** Several companies have upcoming earnings results today, September 23, 2026, including Hindustan Copper Ltd., OneSource Specialty Pharma Ltd., and Vinati Organics Ltd. Recent strong earnings from mid- and small-cap stocks are propelling market rallies.
- **FII/DII institutional flows:** No specific institutional flow data was reported for today's session.
- **Sectoral momentum:** Metal, Realty, and FMCG sectors are leading gains, while IT and Media sectors are trading lower. Mid-cap and Small-cap indices are performing strongly.

4. Commodities & Crypto Wire

- **Crude oil geopolitics & OPEC+ updates:** Oil prices are a critical factor for central bank policy. Hopes for Iran diplomacy could influence WTI Crude Oil prices, potentially adding downward pressure.
- **Gold supply/demand drivers:** Gold (XAU/USD) fell today and remains under pressure, influenced by hawkish Federal Reserve signals and a strong US Dollar. Central bank purchases and safe-haven demand are underlying drivers, but current sentiment is bearish.
- **Major crypto regulatory/adoption headlines:** Bitcoin (BTC) is consolidating around \$86,300, Ethereum (ETH) at \$2,751, and XRP at \$1.57 after recent rallies. Zcash (ZEC) has seen a significant surge, breaking above \$1,600, driven by network activity and institutional inflows. Bitcoin ETFs recorded high inflows in 2026. Crypto miners are increasingly adapting their infrastructure for AI applications.
