📰 SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The US Federal Reserve's policy decision is scheduled for October 28, with market expectations suggesting a potential rate hike by year-end, although the weaker-than-expected September payrolls figures have introduced some uncertainty.
- The European Central Bank (ECB) hiked rates to 2.50% in September and has adopted a hawkish stance, but concerns over financial fragmentation, particularly diverging euro-area bond yields, may limit further tightening, pushing EUR/USD towards the lower end of its long-term range. The ECB has also completed onboarding of the first foreign central banks to its enhanced Euro liquidity facility.
- The Bank of England (BoE) displayed a notably hawkish pivot, laying the groundwork for a potential interest rate hike in November, supported by strong UK inflation data.
- The Bank of Japan (BoJ) is leaning hawkish, with most economists expecting a rate hike in December, and the yen has shown renewed strength amid this outlook and the risk of currency intervention.

2. US & European Markets

- Wall Street is preparing for a data and earnings-packed week, with investor sentiment driven by upcoming corporate earnings, the US Federal Reserve's policy decision, and crude oil prices.
- Mega-cap tech earnings are in focus, with Microsoft (MSFT) expected to report Q1 fiscal 2027 results. Investors will be keenly watching Azure growth, AI services demand, and data center capital expenditures, despite a recent reduction in holdings by some institutional investors. Microsoft also faces ongoing issues with its Universal Print feature in Windows 11.
- Tesla (TSLA) has announced sizeable discounts on its Model 3 and Model Y in Australia following the confirmation that the Cybertruck will not be coming to that market. The company is also reshaping its website to prioritize Robotaxi, Semi, and Roadster, reflecting its strategic bets for 2027 and beyond. Tesla reported positive Q3 adjusted earnings, surpassing expectations, and saw a surge in paid Full Self-Driving (FSD) subscriptions.
- Cautious sentiment persists in EUR/USD markets ahead of the Federal Reserve meeting, limiting sustained upside despite a gradual recovery.

3. Indian Markets & Dalal Street

- Indian equities experienced a significant sell-off this week, with the Nifty 50 declining 2.36% and the BSE Sensex falling 2.15%, extending their losing streak to four consecutive sessions.
- The sell-off was broad-based, with mid-cap and small-cap shares suffering even heavier losses as investors reduced exposure due to rising crude oil prices, persistent foreign investor (FII) outflows, elevated US bond yields, and escalating geopolitical tensions.
- Upcoming Q2 earnings reports from major companies, the US Fed decision, crude oil movements, and the highly anticipated listing of Jio Platforms will be key drivers for Dalal Street in the week ahead.

4. Commodities & Crypto Wire

- WTI Crude Oil prices remain elevated, with Brent crude surging past $117 a barrel, posing a significant source of uncertainty and weighing on global and Indian markets. Geopolitical risks continue to influence oil markets.
- Gold (XAU/USD) trading will likely be influenced by key pivot points, which are widely used by institutional traders to identify intraday support and resistance levels.
- No major market-moving news specifically on crypto regulatory or adoption headlines found today. General market sentiment may be influenced by broader risk appetite.
