- Emerging market currencies are showing mixed performance; those correlated with commodity exports are strengthening, while others face headwinds from capital outflows due to a strong dollar.

2. US & European Markets:

- Wall Street futures are pointing to a moderately positive open, buoyed by early indications of robust performance from key mega-cap tech players and a general risk-on sentiment in the pre-market.
- Mega-cap US stocks like NVIDIA (NVDA) are seeing significant pre-market activity following an analyst upgrade linked to continued strong demand in AI infrastructure. Microsoft (MSFT) also showing positive momentum.
- The semiconductor sector broadly continues to exhibit strength, with sector-specific ETFs trading higher pre-market, reflecting ongoing innovation and demand.

- Nifty 50 futures are indicating a flat to slightly positive start for Indian equities, following a mixed closing yesterday.
- Select corporate earnings announcements have driven stock-specific movements, with financials and capital goods sectors showing particular interest from institutional investors.
- Foreign Institutional Investors (FIIs) have shown marginal net buying in yesterday's session, complementing continued strong support from Domestic Institutional Investors (DIIs), suggesting underlying domestic resilience.

4. Commodities & Crypto Wire:

- WTI Crude Oil prices are rallying strongly in pre-market, driven by renewed geopolitical tensions in the Middle East and consistent rhetoric from OPEC+ regarding supply discipline.
- Gold (XAU/USD) is firming up as a safe-haven asset, finding support from global uncertainties and a slight weakening of the US Dollar in early Asian and European trading hours.
