DAILY MULTI-ASSET TRADING BLUEPRINT & LEVEL EXECUTION MANUAL

Date: August 29, 2026

Session Highlight: New York Session Pre-Open Briefing (1 Hr Before Open)

Session News Focus: Wall Street pre-market movers, US Federal Reserve news, mega-cap US stocks (NVDA, MSFT, TSLA), and WTI Crude Oil catalysts.

SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- **US Federal Reserve Hawkish Stance:**** Federal Reserve Chair Kevin Warsh delivered a hawkish speech at the Jackson Hole Symposium on August 28, stating that inflation remains "too high" and "concerning." He signaled that the central bank might need to raise interest rates in the coming months if inflation doesn't meaningfully slow. This has significantly increased the probability of a September rate hike, pushing two-year Treasury yields higher.
- **Eurozone Inflation & ECB Policy:**** Eurozone inflation data is due next week, which will be a key test for EUR/USD as markets assess the European Central Bank's (ECB) policy outlook. The EUR/USD pair has been in a downward correction ahead of Warsh's speech, with market consensus expecting a hawkish stance from the Fed.
- **India's Forex Reserves at Record High:**** India's foreign exchange reserves reached a historic high of \$729.3 billion by August 21, primarily driven by substantial NRI deposits under a special swap window.
- **USD/JPY Carry Trade:**** The yen's slide has brought the carry trade back into focus, with investors leveraging the wide interest-rate gap between the US and Japan. Despite potential intervention threats, the USD/JPY pair saw a sharp increase following Fed Chair Warsh's hawkish remarks.

2. US & European Markets

- **Nvidia (NVDA) Earnings Boost:**** Nvidia reported exceptional Q2 2026 earnings, with revenue up 106% and net income up 120% year-over-year, significantly beating Wall Street forecasts. The company projects continued strong growth, fueled by AI infrastructure demand and Amazon's planned deployment of additional Nvidia GPUs. This news sent NVDA stock soaring in pre-market trading and boosted other semiconductor stocks.
- **US Equities Futures Mixed:**** Despite Nvidia's strong performance, US index futures were mixed in pre-market trading, with Nasdaq 100 futures up, S&P 500 futures higher, and Dow 30 futures slightly down.
- **Tesla (TSLA) Institutional Flows:**** Institutional investors, including ABN AMRO Bank N.V. and Focus Partners Advisor Solutions LLC, have recently acquired significant positions in Tesla stock during Q2 2026. TSLA was trading at \$357.19 in pre-market on August 28, up 0.67%.
- **US Consumer Confidence Drops:**** US consumer confidence declined in August, driven by factors like fuel and lubricant prices.

3. Indian Markets & Dalal Street

- **Jio Platforms IPO Approval:**** Jio Platforms Ltd, Reliance Industries' digital services arm, received approval from SEBI for an Initial Public Offering (IPO) valued at approximately \$3.8 billion, which is set to be India's largest stock-market listing.
- **UBS Outlook on Indian Markets:**** UBS sees limited near-term upside for Indian equities but remains constructive on a 1-2 year outlook, citing visible earnings growth and easing macro uncertainties. Healthcare and diagnostics are highlighted as preferred sectors.
- **Bank Nifty at Critical Level:**** Bank Nifty is consolidating around the 58,000 mark, which is considered a critical resistance and pivot level for traders. A sustained move above 58,000 could trigger further buying.
- **India's D2C Startup Funding:**** Indian Direct-to-Consumer (D2C) startups have raised approximately \$6 billion between 2021 and August 2026, with a shift towards IPOs and strategic acquisitions as exit options.

4. Commodities & Crypto Wire

- **WTI Crude Oil Catalysts:**** International oil prices rose slightly, with WTI crude trading near \$82 amid ongoing geopolitical talks involving Iran and Oman. Crude oil prices stabilizing have reduced some market uncertainty.
- **Gold Price Action:**** Gold (XAU/USD) experienced a deep pullback after Fed Chair Kevin Warsh's hawkish keynote speech at Jackson Hole. Spot gold dipped below \$4,600, consolidating near local lows. Technical analysis suggests a potential short-term decline towards \$4,511 before a rebound, with overall momentum indicating a downward bias unless key resistance levels are broken.
- **Bitcoin Approaches \$80,000:**** Bitcoin was approaching \$80,000 during the pre-market session on August 27, amidst the broader market enthusiasm sparked by Nvidia's earnings.
