Lead Quantitative Strategist & Institutional Portfolio Manager Briefing

Date: Tuesday, October 6, 2026

Session Highlight:  New York Session Pre-Open Briefing (1 Hr Before Open)

Session News Focus: Wall Street pre-market movers, US Federal Reserve news, mega-cap US stocks (NVDA, MSFT, TSLA), and WTI Crude Oil catalysts.

SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The European Central Bank (ECB) raised its key interest rates by 25 basis points on September 10, 2026, citing persistent inflation pressures, particularly from the Middle East conflict. Headline inflation in the Euro Area is projected to average 3.0% in 2026, 2.5% in 2027, and 2.1% in 2028, with risks to the upside.
- Eurozone inflation hit 3.8% in September, exceeding expectations, with core inflation at 2.5%, largely driven by an 18.8% increase in energy prices. Markets are now pricing in a significant chance of further ECB rate hikes by year-end.
- The US Federal Open Market Committee (FOMC) increased the federal funds target range by 0.25 percentage point to 3.75%-4.00% on September 16, 2026, in response to solid economic expansion and elevated inflation. Federal Reserve officials continue to suggest that further interest rate hikes may be necessary to bring inflation back to target.
- Global inflation concerns have re-emerged, primarily fueled by sustained high energy prices due to ongoing geopolitical developments.

2. US & European Markets

- Wall Street is seeing some positive momentum pre-market, with recent reports indicating Nasdaq jumped 1% and Dow gained 300 points following weaker-than-expected jobs data, which eased some interest rate concerns.
- Mega-cap US technology stocks are in focus; Nvidia's valuation is nearing \$6 trillion, highlighting robust sentiment in the semiconductor and AI sectors. Accenture's Q4 revenue beat expectations, providing a positive lift to other IT service providers.
- US Treasury yields have been scaling multi-year highs as inflation fears persist, potentially creating headwinds, though recent market action shows a mixed response.

3. Indian Markets & Dalal Street

- The Indian equity market extended its recovery for a second consecutive session on Tuesday, with the Sensex rallying over 400 points and the Nifty trading above 22,650, as easing selling pressure provided relief to investors.
- The Reserve Bank of India (RBI) kept the Repo Rate unchanged at 5.50%, a decision that significantly boosted market sentiment. The RBI also raised its FY26 GDP growth forecast to 6.8% and lowered its CPI inflation forecast to 2.6%.
- Banking and metal stocks led the charge, with prominent lenders like Kotak Mahindra Bank showing strong performance due to positive Q2 advances. Domestic Institutional Investors (DIIs) have been providing crucial support, offsetting recent Foreign Institutional Investor (FII) outflows, which totaled ₹35,860 crore in September.
- India's Q2 FY27 IT earnings season is set to begin on October 8, with major companies like TCS, HCLTech, Wipro, and Infosys reporting results, with investors keenly watching revenue growth and AI demand. The capital goods and defense sectors are also anticipating stronger ordering momentum in Q2 FY27.

4. Commodities & Crypto Wire

- WTI Crude Oil prices dropped to near \$89.00 after OPEC+ decided to keep November production targets unchanged, aligning with market expectations. The G7 nations' agreement to release 100 million barrels from emergency reserves also contributed to easing supply pressures.
- Despite easing supply concerns, geopolitical risks in the Middle East, including Houthi control of the Bab el-Mandeb strait, continue to provide some underlying support to crude oil prices, preventing a significant downside. WTI crude oil recently settled down 2.77%.
- In the crypto space, the US Commodity Futures Trading Commission (CFTC) proposed comprehensive new guidelines for crypto market trading, including optional federal licenses for exchanges. Separately, the European Securities and Markets Authority (ESMA) proposed broader MiCA rules for DeFi access, and the SEC outlined a dedicated custody framework for advisers holding crypto. Regulatory scrutiny on stablecoins, such as Tether, continues.

CAPITAL BASE & ALLOCATION RULES (\$3,000 TOTAL)

- **Crypto Futures:** \$400 (13.3%) | Recommended Leverage: 3x-5x Isolated | Risk Capital: 1-2% (\$4-\$8)
