SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- **US Federal Reserve:** The Federal Reserve raised interest rates by 0.25 percentage points in mid-September 2026, marking the first hike since July 2023, in an effort to combat resurgent inflation driven by soaring energy prices. Kevin Warsh is the current Fed Chair, having succeeded Jerome Powell in May 2026. On September 30, 2026, the Federal Reserve Board finalized changes aimed at enhancing the transparency and reducing volatility in its stress tests. Recent softer-than-expected US inflation data, with the PCE price index rising 0.3% and core PCE up 0.2% in August, has started to ease fears of further immediate rate hikes.
- **European Central Bank (ECB):** ECB President Lagarde indicated that she still perceives upside risks to inflation and downside risks to growth, anticipating a higher inflation outlook for 2027 and 2028.
- **Reserve Bank of India (RBI):** India's external debt increased to \$778.2 billion in the June quarter. The Rupee saw gains against the US dollar, likely bolstered by RBI intervention. Analysts suggest that Indian Inc. is robust enough to withstand a 50 basis point rate hike and the impact of El Nino.
- **Currency Drivers:** The US Dollar remains strong, supported by rising treasury yields, leading to gains against most major currencies. The EUR/USD pair managed to rebound from its recent lows, closing Friday on a mildly positive note. Japan's top currency diplomat highlighted clear communications from the Japanese Prime Minister, Finance Minister, and the US regarding the Yen.

2. US & European Markets

- **Wall Street Futures & Pre-market Movers:** Major US index futures, including the S&P 500, Dow Jones, and Nasdaq 100, showed positive movement in pre-market trading on September 30, 2026. Notable pre-market gainers include NewGenIvf Group (NIVF), Connect Biopharma Hldgs (CNTB), and BitVentures (BVC). Conversely, Darkiris Inc. (DKI), Decent Holding Inc. (DXST), and Leslie's, Inc. (LESL) were among the top losers. Ford's stock is sliding due to a supplier disruption, and Conagra's sales volumes have dipped amidst inflation pressures. Firefly Aerospace saw its stock rise following an AI computing deal. Magnolia Oil & Gas (MGY) traded higher after an analyst upgrade and a broader energy sector rally. Texas Pacific Land Corporation (TPL) also saw gains, attributed to consistent insider buying and strategic expansion into AI-related data center infrastructure.
- **Mega-cap Tech Developments:** Nvidia (NVDA) has reinforced the investment case for its stock, driven by AI safety narratives turning into spending opportunities. The market is keenly observing the impact of Tesla's Semi truck. Meta Platforms' introduction of its Muse personal AI agent has significantly boosted its share price. Intuitive Surgical is demonstrating how specialized robotics can cultivate substantial businesses. Faraday Future is exploring robotaxis and integration with Tesla's Cybercab network.
- **Semiconductor Developments:** Navitas Semiconductor (NVTX) showed pre-market gains.
- **European Markets:** European stocks experienced declines as markets weighed elevated EU inflation against softer-than-expected US economic data. Eurozone bond yields eased as expectations for rate hikes cooled.

3. Indian Markets & Dalal Street

- **Sensex/Nifty Updates:** Both the Nifty and Sensex indices were down on September 30, 2026. The Sensex dropped 730 points, influenced by surging crude oil prices and ongoing geopolitical uncertainties.
- **FII/DII Institutional Flows:** Foreign Institutional Investor (FII) selling intensified, with foreign investors withdrawing a substantial Rs 26,000 crore from Indian equities over three days.
- **Corporate Earnings:** Milky Mist Dairy Food shares surged 10% on the back of strong Q1 growth. Zerodha reported a 1.2% increase in its FY26 net profit, reaching Rs 4,283 crore, despite a revenue slowdown. Strong earnings reports have generally propelled mid- and small-cap stocks higher.
- **Sectoral Momentum:** Hospital stocks, including Apollo, Yatharth, Fortis, and Max, faced pressure, dropping up to 7%.

4. Commodities & Crypto Wire

- **WTI Crude Oil & Geopolitics:** Brent crude prices surged above \$109 per barrel. OPEC+ is anticipated to maintain its crude production quotas unchanged for November at its upcoming Sunday meeting, reflecting a cautious stance amidst ongoing Middle East supply disruptions stemming from the Iran conflict. Millions of barrels of Middle East output currently remain offline.
- **Gold Supply/Demand:** Gold prices rose to approximately \$4,200 per ounce on September 30, 2026, primarily due to softer-than-expected US inflation data, which dampened expectations for further Federal Reserve rate hikes. Geopolitical events and central bank policies are significant determinants of gold prices. Demand for gold is predominantly driven by jewelry consumption and investment.
- **Major Crypto Regulatory/Adoption:** The US Senate passed the GENIUS Act, a stablecoin legislation, which is now moving to the House. President Trump signed a joint resolution repealing DeFi broker reporting regulations. State regulators are increasing enforcement actions against crypto firms operating without required licenses. The SEC has proposed tailored exemptions for cryptoasset offerings. The CFTC has submitted its "Regulation Crypto Asset Transactions and Regulation Crypto Asset Markets" proposal to the White House for review.
