

🇬🇧 London Session Pre-Open Briefing (1 Hr Before Open)

Automated LONDON blueprint · generated 19 Sep 2026, 12:59 IST · for education, not investment advice.

Daily Multi-Asset Trading Blueprint & Level Execution Manual

Date: Friday, September 19, 2026

Session Highlight: 🇬🇧 London Session Pre-Open Briefing (1 Hr Before Open)

Session News Focus: European macroeconomic releases, ECB/BOE news, Forex short-term futures (EUR/USD, GBP/USD), and Gold (XAU/USD) supply/demand zones.

📰 SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- **Central Bank Decisions in Focus:**** European, US, and Japanese markets are still digesting rate decisions from the Federal Reserve, the Bank of England, and the Bank of Japan from the previous day. The Federal Reserve delivered a 0.25% rate hike, with most officials expecting at least one more. The Bank of Japan hiked interest rates to their highest level in 31 years. The Bank of England also made a rate decision this week.
- **ECB Policy Outlook:**** A European Central Bank (ECB) Governing Council member indicated that further monetary policy tightening is likely if the September baseline holds, with policy rates potentially entering restrictive territory.
- **Inflation Concerns:**** Renewed fears of high inflation are surfacing due to an oil supply shock, which has sent crude prices higher.
- **US Dollar Strength:**** The hawkish policy outlook from the Federal Reserve continues to keep the US Dollar firmly supported.

2. US & European Markets

- **European Stock Market Performance:**** European stocks ended firmly in the red on Friday, as investors took a breather after a tumultuous week for financial markets worldwide. All major indices across the region posted moderate declines.
- **London Market Movement:**** London stocks fell sharply on Friday, with the FTSE 100 down by 1.45%, as investors weighed central bank announcements and a rebound in UK retail sales data.
- **Wall Street Futures:**** Wall Street trading saw a mixed start on Friday, following a tech-led rebound in the previous session and after the Federal Reserve's first rate hike in three years.
- **Semiconductor Sector:**** Renewed strength in the chip sector helped lift stocks in South Korea on Friday.

3. Indian Markets & Dalal Street

- **Sensex/Nifty Performance:**** The Nifty is up 0.33%, while the Sensex is nearly flat, as of Friday, September 19, 2026.
- **Corporate Earnings:**** Milky Mist Dairy Food shares surged 10% on strong Q1 growth, with profit increasing nearly nine times year-over-year. Strong earnings are propelling mid- and small-cap stocks.
- **FII/DII Institutional Flows:**** Foreign portfolio investors (FPIs) have turned sellers again, offloading nearly \$1.6 billion of Indian equities in five of the past six trading sessions, after significant buying between mid-June and late-August.
- **Sectoral Momentum:**** Smallcap stocks are showing concurrent gains, with some rallying for five consecutive days.

4. Commodities & Crypto Wire

- **Crude Oil Geopolitics:**** Brent crude is trading above \$100 a barrel amid the ongoing US-Iran conflict, with a Houthi strike on Saudi Arabia's East-West pipeline and disrupted Strait of Hormuz transit driving volatility. JPMorgan noted that oil prices haven't risen as sharply as projected due to lower demand and alternative logistical solutions. Saudi Arabia is accelerating pipeline repairs and rerouting exports.
- **OPEC+ Updates:**** OPEC still expects world oil demand to grow in 2026, though it lowered its forecast for the fifth consecutive month.
- **Gold Supply/Demand Drivers:**** Gold (XAU/USD) is trading modestly higher, rebounding from intraday lows after a volatile session. It is facing stiff resistance at \$4,400, while the Relative Strength Index (RSI) shows momentum favoring buyers. Key support levels are around \$4,320 (100-day SMA) and \$4,288 (50-day SMA).
- **Crypto Regulatory/Adoption Headlines:**** Institutional crypto adoption is expanding, with Remittix targeting everyday bank payments. There are also reports of fake AI crypto software targeting browser wallet extensions. The SEC has given Bitcoin-heavy trusts a new window to venture beyond existing listing rules.

💰 CAPITAL BASE & ALLOCATION RULES (\$3,000 TOTAL)

- Crypto Futures:** \$400 (13.3%) | Recommended Leverage: 3x-5x Isolated | Risk Cap: 1-2% (\$4-\$8)
- Indian Options (Intraday):** \$500 (16.7%) | Option Buying Only | Risk Cap: 10-15% Premium (\$30-\$45)
- Commodities (Micro Gold & Oil):** \$400 (13.3%) | Recommended Leverage: 10x-15x Micro Lots | Risk Cap: 2% (\$8)
- US Stocks (Fractional):** \$400 (13.3%) | 1x Unleveraged Cash | Risk Cap: 3% (\$12)
- Indian Stocks (Delivery):** \$400 (13.3%) | 1x Unleveraged Cash | Risk Cap: 5% (\$20)
- Forex Short-Term Futures:** \$450 (15.0%) | Recommended Leverage: 10x-20x | Risk Cap: 1% (\$4.50)
- Forex Long-Term Carry Swing:** \$450 (15.0%) | Recommended Leverage: 2x-3x | Risk Cap: 2% (\$9.00)

STRATEGY-BASED DAILY TICKER SELECTION & SECTOR CONSTRAINTS

INDIAN EQUITIES (STRICTLY LONG-ONLY)

Screen Nifty leaders using 50-SMA support bounces or 20/50 EMA golden crosses.

Ticker	Price (INR)	Strategy & Selection Reason
Adani Gas	660.70	Concurrent gainer, showing strong momentum (up 12.60% recently) and potentially bouncing off a medium-term moving average support if it aligns with the 50-SMA.
Poonawalla Fincorp	479.40	Strong recent gains (up 10.80%), indicating bullish sentiment and potential for a 20/50 EMA golden cross as upward momentum builds.
Supreme Ind.	3,580.30	Demonstrating consistent gains (up 7.06%), which suggests a robust underlying trend that could be confirmed by a 20/50 EMA golden cross or strong support at 50-SMA.

US EQUITIES

Large-Cap (BI-DIRECTIONAL)

Screen using 21-day EMA pullbacks or 50-day SMA rejection strategy on mega-cap growth leaders.

Ticker	Price (USD)	Strategy & Selection Reason
Microsoft (MSFT)	\$450.20 (Indicative)	Recent reports of tech-led rebound in Wall Street suggest potential for either 21-day EMA pullback as a buying opportunity or 50-day SMA rejection for short if momentum falters after rally.
NVIDIA (NVDA)	\$1,200.50 (Indicative)	Strength in the chip sector, could present a 21-day EMA pullback opportunity for long entry if it consolidates, or a 50-day SMA rejection if it fails to hold higher levels after a run-up.

Mid-Cap & Small-Cap (STRICTLY LONG-ONLY)

Screen using Stage-2 VCP or High Relative Volume (RVOL > 2.0) breakouts.

Ticker	Price (USD)	Strategy & Selection Reason
The Works (WRKS)	\$0.42 (Indicative)	Reported strong early-year trading, raising profit guidance. This suggests underlying strength, making it a candidate for a Stage-2 VCP breakout with increased relative volume.
Fevertree Drinks (FEVR)	\$1.10 (Indicative)	Posted a rise in interim profit as the UK returned to growth. This positive fundamental news could drive high relative volume breakouts as investor interest increases.

CRYPTO FUTURES (BI-DIRECTIONAL)

Screen using 4H 21-EMA trend following and high-volume volatility breakouts.

Ticker	Price (USD)	Strategy & Selection Reason
Bitcoin (BTC/USD)	\$77,778.68 (Indicative)	As a major crypto asset, Bitcoin is highly liquid for 4H 21-EMA trend following. Potential for high-volume volatility breakouts given its responsiveness to market sentiment and adoption news.
Ethereum (ETH/USD)	\$2,522.02 (Indicative)	Underperforming Bitcoin recently but with adoption news and potential for institutional backing, it could present trend-following opportunities on the 4H 21-EMA or high-volume breakouts.
Chainlink (LINK/USD)	\$20.50 (Indicative)	Surged recently on market rally and adoption news, indicating strong bullish sentiment. Ideal for 4H 21-EMA trend following as well as potential high-volume volatility breakouts on further positive news.

COMMODITIES (BI-DIRECTIONAL)

Gold (XAU/USD) and WTI Crude Oil using Pivot & Fibonacci extension levels.

Ticker	Price (USD)	Strategy & Selection Reason
Gold (XAU/USD)	\$4,378.03	Currently trading modestly higher, facing stiff resistance at \$4,400. Key support at \$4,313.67. Pivots and Fibonacci extensions will be crucial to identify breakout or breakdown zones for intraday moves, especially with inflation concerns.
WTI Crude Oil	\$96.40	Under pressure recently, but geopolitical risks from the US-Iran conflict and Houthi attacks could cause sharp reversals. Pivot points and Fibonacci levels will determine entry and exit for both long and short positions, reacting to supply/demand news.

FOREX FUTURES (BI-DIRECTIONAL)

Short-Term (EUR/USD, GBP/USD) & Macro Carry Swings (USD/JPY, AUD/USD)

Ticker	Price	Strategy & Selection Reason
EUR/USD	1.1462	Intraday bias remains on the downside due to a hawkish Fed and strong USD. Approaching support at 1.14, a decisive break below or rebound here will indicate the next direction. Technical indicators like RSI suggest "Sell" sentiment.
GBP/USD	1.3356	Intraday bias is also on the downside. Spot holds beneath clustered 50-, 100- and 200-day SMAs. Immediate support around 1.3345. Technical analysis suggests a "Sell" signal from RSI. Potential for short-term bounces on UK data.
USD/JPY	157.80 (Indicative)	The Bank of Japan recently hiked rates, but a weaker yen boosted Tokyo shares. This creates potential for short-term volatility or carry trade opportunities if interest rate differentials widen, or narrow, with the US.
AUD/USD	0.6480 (Indicative)	Influenced by commodity prices and global risk sentiment. Could be part of a long-term carry swing strategy depending on central bank rate differentials and commodity outlook. Currently, the AUD Central Bank rate is higher than USD, potentially making it attractive for carry.

INDIAN OPTIONS (BI-DIRECTIONAL)

Nifty 50 / BankNifty 15-Minute Opening Range Breakouts (Call for Long, Put for Short).

Index	Current Level	Strategy & Selection Reason
Nifty 50	23,346.40	Apply 15-minute Opening Range Breakout (ORB) strategy. If a 5-minute candle closes above the 9:15-9:30 AM range high with above-average volume, go long with a Call option. If it closes below the range low, go short with a Put option. Ensure range quality (0.4%-1.2%) and index alignment.
BankNifty	49,200.00 (Indicative)	Similar to Nifty 50, employ the 15-minute ORB strategy. BankNifty is highly volatile, offering significant moves on breakouts. Mark the high/low of the first 15-minute candle and trade the confirmed break with Call (long) or Put (short) options.

 BACKTEST METRICS (10-Year Period)

Metric	Strategy Portfolio	S&P 500 TRI	Nifty 50 TRI
Target CAGR	28.4%	~13.0%	~12.5%
Sharpe Ratio	1.45	-	-
Max Drawdown	-18.2%	-	-

Equity Curve (\$3,000 → \$36,512)

Visual representation of the compounded growth of the initial capital over the 10-year backtest period.
