SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- The Reserve Bank of India (RBI) unanimously increased its repo rate by 25 basis points to 5.50%, marking its first hike since February 2023, and shifted its monetary policy stance to 'calibrated tightening' to manage rising inflation. This decision signals that rate cuts are off the table in the near term, with a possibility of another hike in December if inflationary pressures persist. The RBI has also raised its FY27 GDP growth forecast to 7.1% but projects CPI inflation to reach 5.2% in FY27.
- The European Central Bank (ECB) has its next monetary policy meeting scheduled for October 28-29, 2026, with market pricing indicating a close call for a potential rate hike.
- Markets are keenly awaiting the minutes from the latest US Federal Reserve (FOMC) meeting for further clues on the future trajectory of interest rates. While expectations for an October rate hike have fallen to around 20-20.5%, traders still price in an 84.5-88% chance of another rate increase by December. The US dollar remains strong, supported by elevated Treasury yields, with the 10-year yield back above 5.3%.
- The EUR/USD pair is facing bearish pressure, trading around 1.1234, influenced by political and budget uncertainty in France, a robust US dollar, and rising oil prices. The GBP/USD is also weakening, trading around 1.3250, due to a stronger US dollar and persistent oil price concerns. French-German 10-year bond spreads have widened to almost 160 basis points, reflecting heightened fiscal concerns in France.

2. US & European Markets

- US markets closed higher on Tuesday, but European equities edged lower on Wednesday, ending a three-day rally, as rising oil prices and an ascent in global bond yields dampened sentiment. The pan-European Stoxx 600 index was down 0.47%.
- Tesla (TSLA) is actively lobbying European safety regulators for the approval of its advanced driver-assistance technologies, having recently secured its first formal approval in the Netherlands and national approvals in seven other EU member states. Despite beating Q3 2026 delivery forecasts with 486,532 vehicles, Tesla's stock is considered modestly overvalued at approximately \$380.68.
- BE Semiconductor Industries saw its stock fall by 7.2% after UBS downgraded the Dutch chip-equipment maker to "sell."

3. Indian Markets & Dalal Street

- Indian benchmark indices, Sensex and Nifty 50, opened and traded lower on Wednesday, reversing a two-day gaining streak. The Sensex dropped approximately 327-460 points to trade around 72,599-72,740, while the Nifty 50 declined 133-164 points, trading below 22,650. This downturn followed the RBI's repo rate hike and a spike in crude oil prices.
- Foreign Institutional Investors (FIIs) offloaded equities worth ₹2,961.30 crore on Tuesday, indicating outflows.
- Among Sensex constituents, Titan, Asian Paints, Bharat Electronics, Maruti, Axis Bank, and Mahindra & Mahindra were among the laggards in early trade. Conversely, Bajaj Finance and Bharti Airtel were reported as gainers, with Kotak Mahindra Bank and ICICI Bank also showing upward movement.

4. Commodities & Crypto Wire

- WTI crude oil prices rose to around \$89.50-\$90.25 per barrel, while Brent crude traded above \$101-\$101.60 per barrel. This surge is primarily due to renewed Middle East tensions, including intensified Iranian attacks on tankers in the Strait of Hormuz and Houthi attacks on Saudi Arabia, compounded by a developing storm in the Gulf of Mexico threatening US oil and gas production. The EIA forecasts Brent crude to average \$105 per barrel in Q4 2026 and \$98 per barrel for the entirety of 2026. WTI crude is technically poised for a further rally towards \$94.50.
- Gold prices slipped on Wednesday, with spot gold falling 0.6-0.8% to \$4,130-\$4,138 per ounce, as the US dollar strengthened and investors awaited the release of the Fed minutes for clearer signals on the monetary policy path. In the Indian market, 24K gold prices also decreased, trading around ₹14,957-₹15,023 per gram.
- There is no specific major crypto regulatory or adoption news reported today.
