SECTION 0: DAILY MACRO & FINANCIAL NEWS DIGEST

1. Global Macro & Central Banks

- ****Inflation Concerns Persist Globally:**** Eurozone inflation accelerated to 3.8% in September, well above the ECB's 2% target, with energy inflation jumping to 18.8%. Further ECB tightening remains a possibility, with a 65% probability of a December increase.
- ****Fed Hints at Cautious Approach:**** The Federal Reserve extended the comment period on its proposal to modernize Regulation O until November 4. Recent communications suggest the Fed is not in a hurry for aggressive rate hikes, though a couple more increases are likely. The FOMC minutes from September 15-16, 2026, were released, detailing the committee's considerations.
- ****RBI Takes Measures to Support Rupee:**** India's central bank announced measures to support the rupee, which has fallen close to its record low. The RBI will open a special window to meet daily dollar requirements for government oil-marketing companies and has cut the limit for exchange-traded currency derivatives involving the rupee. RBI is expected to deliver an additional 50 basis points of interest rate increases across its next two policies, with the terminal repo rate reaching 6.0%.
- ****Global Growth Slowdown Expected:**** The UN trade body projects global economic growth to slow to 2.6% in 2026 from 2.9% last year, citing the energy shock from the Middle East crisis. Developing economies are expected to grow 4% this year, down from 4.7% in 2025.

2. US & European Markets

- ****Wall Street Futures Mixed with Tech Leading:**** US stock futures are showing mixed signals, with tech-heavy Nasdaq 100 futures leading gains pre-market.
- ****Mega-Cap Tech Movers:**** NVIDIA (NVDA), Microsoft (MSFT), and Tesla (TSLA) are seeing pre-market gains, suggesting a stabilization in growth stocks. Apple (AAPL) is down over 2% pre-market due to cuts in iPhone 18 Pro & Pro Max component orders amid weaker-than-expected demand.
- ****Earnings Season Kicks Off:**** Q3 earnings season is underway. Delta Air Lines (DAL) reported profit missed expectations and cut its FY EPS guidance, leading to a pre-market dip. IBM's earnings are also in focus ahead of their October release.
- ****Semiconductor Sector Resilience:**** South Korea and Japan are benefiting from demand for semiconductors and electronics, supporting overall manufacturing improvements.
- ****European Equities Retreat:**** European equities broadly retreated amid higher oil prices and rising US 10-year Treasury yields, which fueled inflation fears.

3. Indian Markets & Dalal Street

- ****Nifty and Sensex Eyeing Recovery:**** Indian stock markets ended the week of October 5-9, 2026, on a positive note, breaking an eight-week losing streak. The Nifty 50 briefly broke crucial support but rebounded sharply, suggesting a potential bottoming process.
- ****Corporate Earnings in Focus:**** Several companies, including Avenue Supermarts, Premier Polyfilm, Karnika Industries, and LCC Infotech, are scheduled to post Q2 earnings today. Tata Consultancy Services (TCS) reported a 14.98% YoY increase in consolidated net profit for Q2 FY27, leading to strong buying in IT stocks.
- ****FII/DII Flows:**** Persistent FII outflows and elevated crude oil prices continue to weigh on sentiment, despite recent domestic buying. Jefferies remains overweight on India despite a 16% dollar slide this year, citing strong long-term prospects.
- ****Banking Sector Outlook:**** The near-term technical outlook for Bank Nifty remains cautiously constructive, with sustained trading above 55,200 strengthening recovery momentum.

4. Commodities & Crypto Wire

- ****WTI Crude Oil Volatility:**** WTI crude oil is trading around \$90.63 per barrel, down slightly from yesterday's settlement, as renewed US-Iran diplomatic discussions ease supply fears. However, earlier in the week, Brent crude surged over 4% past \$104 per barrel amid escalating Middle East tensions and a hurricane in the US Gulf of Mexico shutting in production. OPEC+ countries have agreed to keep November 2026 production targets unchanged, with their next meeting scheduled for November 1.
- ****Gold Finds Support:**** Gold prices are climbing to approximately \$4,120 per ounce, supported by inflation concerns and returning Chinese demand.
- ****Crypto Regulatory Developments:**** The Commodity Futures Trading Commission (CFTC) issued an advance notice of proposed rulemaking on October 5, 2026, to establish a comprehensive regulatory framework for retail crypto asset transactions and exchanges. FinCEN also announced the withdrawal of proposed rules related to convertible virtual currencies and unhosted wallets as part of a deregulatory agenda. The Treasury's GENIUS Act compliance deadline for foreign-issued stablecoins is October 19, 2026, with an enforcement date of January 18, 2027, creating uncertainty in the crypto industry.
